Remarks/Market Observations: The following observations were gathered from market personnel and vendors this week: 1. Lower supplies of fresh marine commodities were noted among the monitored retail markets this week. This could be due to the low volume of catch from major source area due to the effects of heavy rainfall in the Eastern parts of the Southern Luzon and Visayas. Further, another possible reason is the implementation of Closed Fishing Season in Visayan Sea (for sardines, herrings, and mackerels) last November 15, 2023. 2. For local-fresh galunggong (<i>Decapterus macrosoma</i>), minimal supplies were noted due to the Closed Fishing Season (CFS) for galunggong in Northern Palawan (major source area) on 1 November 2023 until 31 January 2024. The prevailing retail price was at Php240.00/kg and supplies were mostly sourced from Malabon and Navotas Fish Ports. According to fish vendors, higher wholesale price were noted in major fishports. Other local galunggong variants like "balsa" (<i>Decapterus macarellus</i>), "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) were noted in some of the monitored retail markets this week. 3. There is an increased in the supplies of imported-frozen galunggong "lalaki" (<i>Decapterus macrosoma</i>) at the monitored retail markets this week. This may be attributed to the low supply of local galunggong due to the implementation of CFS in Northern Palawan. The prevailing retail price of imported-frozen galunggong was at Php200.00 & 240.00/kg this week. Other imported-frozen commodities like pampano, salmon mackarel, salmon head & belly, pusit kalawang, and tulingan were noted in the market. 4. Adequate supplies for medium-sized alumahan were noted among the monitored retail markets this week. The prevailing retail price was at Php240 & 360/kg and were mostly sourced from Navotas and Malabon Fish Ports. Prices vary depending on the quality (in terms of freshness), source area and size. 5. For aquaculture commodities like bangus and tilapia, the prevailing retail prices remained at Php160 & 180/kg and Php130/kg, respectively, this week. This may be due to the sufficient and stable supplies at the monitored retail markets. Supplies were still mostly sourced from Bulacan/Pangasinan and Pampanga/Batangas, respectively. Higher demand for larger size of bangus were still noted in some of the monitored markets (i.e., Trabajo, Quinta, Tandang Sora, Galas, and Kamuning Markets). Some of the buyers still prefer tilapia sourced from Batangas due to the commodity's quality (in terms of taste and appearance). There is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia. 6. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: a. Bangus - Bulacan, Pangasinan b. Tilapia - Batangas, Pampanga c. Local Galunggong - Navotas & Malabon Fish Ports d. Alumahan - Navotas & Malabon Fish Ports																									
			Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena. 1. <i>Rastrelliger kanagurta</i> or Alumahan (Medium) - (Php240 & 360) - lowest prevailing price of Php240.00/kg were recorded at Polo Market where supplies were not in good quality (supplies from previous days), hence, the lower price. Highest prevailing price of Php360.00/kg was noted at Mandaluyong Market where supplies recorded were in good quality and sourced from a primary market, hence, the higher price. 2. <i>Decapterus macrosoma</i> or Galunggong "lalaki" - (Php200 - 300/kg) - lowest prevailing price of Php200.00/kg were recorded at Maypajo Market where supplies were not in good quality (supplies from previous days), hence, the lower price. Highest prevailing price of Php300.00/kg was noted at Marikina Market where supplies recorded were in good quality and sourced from a primary market, hence, the higher price. 3. <i>Amblygaster sirm</i> or Turay - (Php100 - 220/kg) - both the lowest and highest prevailing retail price were recorded in Malabon Market. The difference in the price were due to the source of the commodity, wherein the supply of lowest prevailing price of 100.00/kg was stocks from previous market days and the highest prevailing price of Php220.00/kg was good in quality. 4. <i>Glossogobius giuris</i> or Bias - (Php200.00 & 420.00/kg) - lowest prevailing price of Php200.00/kg were recorded at Polo Market where supplies were sourced directly from nearby Fish Port (e.g., Navotas Fish Port), hence, the lower price. Highest prevailing price of Php420.00/kg was noted at Marikina Market where supplies recorded were in good quality and sourced from a secondary market, hence, the higher price. 5. <i>Siganus</i> sp. or Samaral - (Php260.00 & 500.00/kg) - lowest prevailing price of Php100.00/kg were recorded at Pasig Market where supplies were not in good quality (supplies from previous days), hence, the lower price. Highest prevailing price of Php300.00/kg was noted at Malabon Market where supplies recorded were in good quality, hence, the higher price.																						
(-) - Price and Volume not available during price monitoring (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring. NA - Source Area not available during price monitoring
