Remarks/Market Observations: The following observations were gathered from market personnel and vendors this week: 1. Minimal but sufficient supply of fresh marine commodities were observed among the monitored retail markets this week. However, ample availability or "dagsa" of yellowfin tuna (<i>Thunnus albacares</i>) was noted specifically in Commonwealth market. Meanwhile, limited supply of local fresh galunggong lakali (<i>Decapterus macrosoma</i>) was still observed in most of the monitored retail markets. This might be due to the ongoing implementation of Closed Fishing Season for galunggong in Northern Palawan (major fishing ground). 2. Relative to the minimal supply of local galunggong variants, vendors remain to purchased medium to large-sized imported-frozen galunggong lakali sourced mainly from Navotas Fish Port. 3. For medium-sized alumahan, minimal supply was observed in the monitored retail markets this week as majority of the size available was large. Nevertheless, supply of hasa-hasa (other variant of alumahan) was observed in the monitored markets sourced mainly from Malabon Fish Port. 4. Adequate availability of bangus and tilapia were observed among the monitored retail markets this week. More specifically, more supply of bangus was reported by the fish vendors in Farmers market on 1 December 2023. As a result, lower price of the commodity was recorded. 5. Major source areas of the top fishery commodities in the monitored markets are as follows: b. Retail b.1. Bangus - Bulacan b.2. Tilapia - Batangas b.3. Local Galunggong- Malabon and Navotas Fish Port b.4. Imported Galunggong - Navotas Fish Port b.5. Alumahan -Malabon Fish Port																																																					
			General Observations: Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena. 1. <i>Scylla serrata</i> or Alimango Mixed (Male & Female) - (Php-730.00-850.00/kg)- both prevailing price were recorded in Malabon Market, wherein highest recorded price was observed larger supply of the commodity, hence offer in a premium price. Meanwhile, lowest prevailing price were smaller in size resulting to offer the commodity in a cheaper price. 2. <i>Coryphaena</i> spp. or Dorado-(Php110.00-320.00/kg)- Similarly, both prevailing price were recorded in Navotas Fish Port, wherein highest prevailing price (Php320.00/kg) was observed to have premium quality in terms of freshness, hence offer in a higher price. On the other hand, lowest recorded price of Php110.00/kg was observed to be smaller in size and relatively lower in quality in terms of freshness sourced from Navotas Fish Port.																																																		
(-) - Price Not Available During Price Monitoring (*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring. NA - Source Area not available during price monitoring Markets 1-10 (Trabajo to Galas) - Monitored by BFAR-FIDSSD (CO) Enumerators Markets 11-16 (Malabon Central to Ugong Valenzuela) - Monitored by BFAR-NCR Enumerators Note: Suspension of PM activity in eleven (11) monitored markets on 28 November 2023 is due to the conduct of National Planning Workshop of Marketing Programs and Activities for FY 2024
