(-) - Price and Volume not available during price monitoring
(*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

REMARKS AND MARKET OBSERVATIONS

CAR

WEEK 1- OCTOBER 30-NOVEMBER 3, 2023

Fishery commodities in the monitored markets were purchased from the dealers of Baguio City.
For tilapia, supplies were chiefly sourced from Ambuklao Dam and Magat Dam. Also, some of the tilapia and hito in markets were harvested from the fisherfolk’s backyard fishponds.
For bangus, supplies were sourced from region 1, regions 3, and region 4A.
Prices may be affected by the varying quality (freshness), size and source area.

WEEK 2- NOVEMBER 6-10, 2023

Supply of marine fishery commodities were consistently available among the monitored markets.
Nonetheless, prices may still vary depending on the size, freshness, and source areas.
Likewise, for bangus and tilapia, supply remained available for the consuming public.
Supplies of tilapia in the monitored markets were sourced from Ambuklao and Magat Dam.

WEEK 3- NOVEMBER 13-17, 2023

Fishery commodities available in the monitored markets were pruchased from the dealers of Baguio City.
For tilapia, supplies were sourced from Ambuklao Dam and Magat Dam.
For bangus, supplies were usually derived from Pangasinan and Bulacan.
Prices may vary depending on the commodity’s size, freshness, and source areas.

WEEK 4- NOVEMBER 20-24, 2023

Steady supply of marine fishery commodities was observed among the monitored markets.
Supplies of tilapia were chiefly from Ambuklao and Magat Dam.
Prices may still vary depending on the size and source areas.

WEEK 5- NOVEMBER 27-DECEMBER 1, 2023

Supply of marine fishery commodities sold in the provinces of Benguet and Mountain Province were purchased from the dealers of Baguio City.
Constant supply of aquaculture commodities (i.e., bangus and tilapia) was observed in the monitored markets.
Specifically, for bangus (Chanos chanos), supply available were sourced from R1, R3, and R4A.
For tilapia (Oreochromis niloticus), supply available were harvested in the backyard fishpond of fisherfolk. Other supply were from Ambukalo Dam and Magat Dam.
Nonetheless, prices of fishery commodities in the monitored markets may be affected by the varying sizes, freshness, and source areas of the commodity.

R1

WEEK 1- OCTOBER 30-NOVEMBER 3, 2023

Minimal supplies of fresh marine commodities were observed among the monitored markets this week. This could be due to the inclement weather condition hampering fishing operation of the fishermen.
More specifically, supply of bangus, tilapia, and galunggong were still available in the monitored markets.
Frozen galunggong was still evident in the province of Ilocos Sur, La Union and Pangasinan at Php150.00-Php220.00 /kg. Difference in price may be due to the varying sizes of the commodity.

WEEK 2- NOVEMBER 6-10, 2023

Supply of top fishery commodities like bangus, tilapia, and local-fresh galunggong continued to be present among the monitored markets this week.
Likewise, for imported-frozen galunggong lalaki, supplies were recorded in the province of Ilocos Sur, La Union and Pangasinan at Php140.00/kg-Php220.00/kg. Difference in price might be due to the varying sizes of the commodity.

WEEK 3- NOVEMBER 13-17, 2023

Supplies of top fishery commodities (i.e., bangus, tilapia, and galunggong) continued to be available among the monitored markets this week.
Presence of frozen galunggong was also observed in the province of Ilocos Sur and Pangasinan at Php100.00/kg-Php200.00/kg. Difference in price could be due to the varying sizes.

WEEK 4- NOVEMBER 20-24, 2023

Due to the Northeast Monsoon or Hanging Amihan, minimal availability of marine fishery commodities were noted.
Nonetheless, supply of aquaculture commodities were sufficient to cater to the demand of the buying public.
Frozen galunggong were still present in the province of Ilocos Sur and Pangasinan at Php160.00/kg - Php240.00/kg. Difference in price could be due to the varying sizes.

WEEK 5- NOVEMBER 27-DECEMBER 1, 2023

Steady supply of fishery commodities was observed.
Among the commodities recorded were bangus (*Chanos chanos*), tilapia (*Oreochromis niloticus*), galunggong (*Decapterus* spp.), and others.
Presence of frozen galunggong were also reported in the province of Ilocos Sur and Pangasinan at Php100.00/kg - Php220.00/kg. Difference in price may be due to the varying sizes of the commodity.

R2																						
WEEK 1- OCTOBER 30-NOVEMBER 3, 2023																						
Prices of tilapia and milkfish increased due to high cost of inputs.																						
WEEK 2- NOVEMBER 6-10, 2023																						
Stable and sufficient supply of fishery commodities was reported.																						
WEEK 3- NOVEMBER 13-17, 2023																						
Due to inclement weather condition, fewer supply of fresh marine commodities were noted at the time of monitoring.																						
WEEK 4- NOVEMBER 20-24, 2023																						
Due to the inclement weather condition, minimal supply of marine fishery commodities.																						
WEEK 5- NOVEMBER 27-DECEMBER 1, 2023																						
Limited supply of fresh fishery commodities were observed at the of price monitoring in the monitored markets.																						
This might be because fishing operations have been hampered by the unfavorable weather during the past few days.																						
R4A																						
WEEK 1- OCTOBER 30-NOVEMBER 3, 2023																						
Availability of fresh marine commodities remained adequate in all monitored markets this week.																						
Fluctuation in the prices of fishery commodities might be influenced by several factors such as the commodity's size, the volume of supply, difference in source area, and other natural phenomena.																						
WEEK 2- NOVEMBER 6-10, 2023																						
Sufficient supply of fresh marine commodities were noted this week.																						
Prices may fluctuate due to the varying sizes available at the time of monitoring, sizes, and source areas of the commodity.																						
WEEK 3- NOVEMBER 13-17, 2023																						
Adequate volume of fresh marine commodities were reported this week.																						
Fluctuation in the prices of fishery commodities may be influenced by several factors such as the commodity's size, the volume of supply, source area, and other natural phenomena like bad weather condition.																						
WEEK 4- NOVEMBER 20-24, 2023																						
Sufficient supply of marine fishery commodities was observed at the time of monitoring.																						
However, low supply of galunggong and tamban was reported which may be due to the implementation of closed fishing season.																						
WEEK 5- NOVEMBER 27-DECEMBER 1, 2023																						
Availability of fresh marine commodities remained adequate in all monitored markets this week.																						
Fluctuation in the prices of fishery commodities may be influenced by several factors such as the commodity's size, the volume of supply, source area, and other natural phenomena.																						
R4B																						
WEEK 1- OCTOBER 30-NOVEMBER 3, 2023																						
Sufficient supply of fishery commodities were observed among the monitored retail markets.																						
However, prices of some fishery commodities increase in price due to the transportation expenses.																						
WEEK 2- NOVEMBER 6-10, 2023																						
Sufficient supply of fishery commodities was observed in the monitored markets this week.																						
Prices may be affected by the logistic cost.																						
WEEK 3- NOVEMBER 13-17, 2023																						
Due to transportation expenses, prices of fishery commodities were higher in some province.																						
WEEK 4- NOVEMBER 20-24, 2023																						
Constant supply of marine and aquaculture commodities were reported this week.																						
WEEK 5- NOVEMBER 27-DECEMBER 1, 2023																						
Ample supply of fishery commodities was observed among the monitored markets this week.																						
Nonetheless, prices may be affected by the varying freshness (in terms of sizes and freshness) and source areas.																						
R5																						
WEEK 1- OCTOBER 30-NOVEMBER 3, 2023																						
Due to the inclement weather condition in the province of Sorsogon, minimal volume of marine fishery commodities were observed.																						
Commodities recorded were red-tail scad, round-scad, island mackerel, oxeye scad, shrimp, false trevally, common silver-biddy, fork-tailed threadfin bream, pickhandle barracuda, mantis shrimp, oriental sillago, buccaneer anchovy, and others.																						
Likewise, for bangus, tilapia, and hipon, minimal decrease in supplies were noted in the monitored markets .																						
WEEK 2- NOVEMBER 6-10, 2023																						
Minimal supply of fishery commodities was reported this week.																						
In fact, prices of commodities increased in price as compared from the previous monitoring weeks.																						
WEEK 3- NOVEMBER 13-17, 2023																						
Due to the inclement weather condition caused by the heavy rainfall, minimal supply of marine fishery commodities were reported.																						
Commodities recorded were pangasius/creamdory,bighead carp, Island mackerel, rainbow runner, oxeye scad, giant trevally, blue marlin, shrimp, false trevally, common silver-biddy, mantis shrimp, buccaneer anchovy, Indian anchovy, and others.																						
WEEK 4- NOVEMBER 20-24, 2023																						
Low supply of marine fishery commodities was observed in the monitored markets this week. This may be due to the bad weather condition hampering fishing operations.																						
Availability of frozen commodities (i.e, burot and hiwas) was also recorded.																						
WEEK 5- NOVEMBER 27-DECEMBER 1, 2023																						
Due to the inclement weather condition, minimal but sufficient supply of fishery commodities was observed among the monitored markets this week.																						
Commodities recorded were bighead carp, tigertooth croaker, red-tail scad, short fin scad, big-eyed scad, yellowbelly threadfin bream, silver prompret, and others.

R6																					
WEEK 1- OCTOBER 30-NOVEMBER 3, 2023																					
Lesser supply and varieties of marine fishery commodities were observed at the time of monitoring in the markets.This could possibly be affected by the occurrence of full moon and unfavorable weather condition that hamper fishing operation of the fishermen.																					
Steady supply of aquaculture commodities like bangus and hipon were noted in the monitored markets.																					
Some of the fish stalls were closed at the time of monitoring which might be due to the commemoration of All Saint's Day.																					
WEEK 2- NOVEMBER 6-10, 2023																					
Steady supply of fishery commodities were reported among the monitored markets this week.																					
No shellfish was recorded which could be due to the occurrence of Red Tide specifically in the province of Capiz.																					
WEEK 3- NOVEMBER 13-17, 2023																					
Supplies of marine fishery commodities remained available among the monitored markets.																					
Likewise, constant supplies for aquaculture commodities (bangus, tilapia, and shrimp) were reported.																					
No shellfish was noted in Capiz due to the occurrence of red tide.																					
Low influx of buyers observed in Aklan and Iloilo during the monitoring.																					
WEEK 4- NOVEMBER 20-24, 2023																					
Steady supply of fishery commodities were reported among the monitored markets this week.																					
Among the commodities recorded were grouper, shrimp, squid, and others.																					
Likewise, stable supply of bangus and tilapia were noted.																					
WEEK 5- NOVEMBER 27-DECEMBER 1, 2023																					
Minimal but sufficient supply of fresh marine commodities was observed among the monitored markets. Per interview with fish vendors, this is due to the presence of full moon on 27 November.																					
During full moon, fishes tend to scatter making them hard to catch.																					
Nonetheless, for aquaculture commodities (i.e., bangus and tilapia), steady and sufficient supply was noted this week.																					
No shellfish available in Capiz which may be due to the occurrence of Red Tide.																					
R7																					
WEEK 1- OCTOBER 30-NOVEMBER 3, 2023																					
Sufficient volume of fishery commodities were observed among the monitored markets.																					
WEEK 2- NOVEMBER 6-10, 2023																					
Sufficient supply of fishery commodities was observed in all the monitored markets.																					
WEEK 3- NOVEMBER 13-17, 2023																					
Minimal supply of marine fishery commodities were noted which could possibly be due to the bad weather condition hampering fishing operations.																					
WEEK 4- NOVEMBER 20-24, 2023																					
Minimal but sufficient supply of fishery commodities were observed among the monitored markets this week.																					
This may be influenced by the presence of Northeast Monsoon of Hanging Amihan.																					
WEEK 5- NOVEMBER 27-DECEMBER 1, 2023																					
Due to the bad weather condition, low supply of marine fishery commodities was observed in the monitored markets.																					
R8																					
WEEK 1- OCTOBER 30-NOVEMBER 3, 2023																					
Sufficient supply of fishery commodities were observed during the conduct of price monitoring.																					
Prices might be affected by the difference in terms of sizes and source areas.																					
WEEK 2- NOVEMBER 6-10, 2023																					
Sufficient supply of fishery commodities were noted during the conduct of price monitoring.																					
Prices may vary depending on the size and source area of the commodity.																					
WEEK 3- NOVEMBER 13-17, 2023																					
Sufficient supply of fsbery commodities were noted at the time of monitoring.																					
Prices may be influenced by the size, freshness, and source areas.																					
WEEK 4- NOVEMBER 20-24, 2023																					
Sufficient supply of marine fishery commodities was noted at the time of monitoring.																					
Prices may fluctuate due to the varying size, freshness, and source areas.																					
WEEK 5- NOVEMBER 27-DECEMBER 1, 2023																					
Sufficient supply of fish was noted during the conduct of price monitoring the markets.																					
Prices may be affected by various factors such as commodity's sizes and source areas.																					
R9																					
WEEK 1- OCTOBER 30-NOVEMBER 3, 2023																					
Less volume of fishery commodities were observed in the monitored markets. This could be due to the bad weather condition that hampers fishing operation.																					
Pricing on fishes depend on its quality and size.																					
WEEK 2- NOVEMBER 6-10, 2023																					
Most of the prices of displayed fishery commodities in the monitored markets were steady.																					
Nonetheless, difference in prices might be influenced by the varying sizes and quality of the commodity.																					
WEEK 3- NOVEMBER 13-17, 2023																					
High volume of fishery commodities unloaded at the monitored markets this week. This may be due to the fair-weather condition in the region.																					
Prices of fishery commodities may still be affected by the varying sizes and quality.																					
WEEK 4- NOVEMBER 20-24, 2023																					
Due to the presence of bright moon wherein fishes tend to scattered making them hard to catch, minimal but sufficient volume of marine fishery commodities were reported.																					
The Closed Fishing Season for sardines started last 15 November 2023 and will end on 15 February 2024.																					
WEEK 5- NOVEMBER 27-DECEMBER 1, 2023																					
Due to the inclement weather condition and presence of full moon, minimal volume of marine fishery commodities was observed in the monitored markets this week.																					
As a result, prices of some fishery commodities moderately increased.																					
R10																					
WEEK 1- OCTOBER 30-NOVEMBER 3, 2023																					
Stable supplies of bangus, tilapia, and galunggong were recorded in the monitored markets.																					
Price fluctuation may be caused by the oil price and weather condition.																					
WEEK 2- NOVEMBER 6-10, 2023																					
Stable supply of fishery commodities were noted among the monitored markets this week.																					
Prices may be influenced by the oil price hike which affects logistic cost.																					

TOP FISHERY COMMODITIES				Regional Prevailing Price (Php/kg)																		NATIONAL										
Scientific Name		English Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	CARAGA	NCR	Prevailing Price (Php/kg)	High	Low										
General Observation Fluctuation in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volumes of available supply, source area, as well as the weather condition and other natural phenomena. 1. <i>Acanthurus olivaceus</i> or Uring (Php 90.00-450.00 /kg) - supplies with the lowest prevailing price of Php 90.00 /kg were recorded in Region 4A wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 450.00 /kg were recorded in Region 2 wherein the available supply were larger in size, hence, price was higher. 2. <i>Amblygaster sirm</i> or Turay (Php 90.00-200.00 /kg) -supplies with the lowest prevailing price of Php 90.00/kg were recorded in Region 4A wherein the said commodity was smaller in size, hence, price is lower compared to NCR. 3. <i>Caesio caeruleaurea</i> or Dalagang bukid bilog (Php 200.00-360.00 /kg) - supplies with the lowest prevailing price of Php 200.00 /kg were recorded in Region 9 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 360.00 /kg were recorded in Region 7 wherein the available supply were larger in size, hence, price was higher. 4. <i>Carangoides malabricus</i> or Talakitok (Php 200.00 & 300.00 /kg)- both the lowest and highest prevailing prices of Php 200.00/kg and Php 300.00/kg, respectively, were recorded in Region 6. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available. 5. <i>Caranx melampygus</i> or Talakitok (Php 300.00-500.00 /kg) - both the lowest and highest prevailing prices of Php 300.00/kg and Php 500.00/kg, respectively, were recorded in Region 7. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available. 6. <i>Corbicula fluminea</i> or Burnay (Php 80.00-350.00 /kg)- both the lowest and highest prevailing prices of Php 80.00/kg and Php 350.00/kg, respectively, were recorded in Region 10. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available. 7. <i>Dendrophysa russelii</i> or Alakaak (Php 160.00 & 360.00 /kg)- both the lowest and highest prevailing prices of Php 160.00/kg and Php 360.00/kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available. 8. <i>Glossogobius celebius</i> or Biya (Php 300.00 & 420.00 /kg) - supplies with the lowest prevailing price of Php 300.00 /kg were recorded in Region 1 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 420.00 /kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher. 9. <i>Lambis lambis</i> or Ganga (Php 200.00 & 320.00 /kg) - both the lowest and highest prevailing prices of Php 200.00/kg and Php 320.00/kg, respectively, were recorded in Region 8. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available. 10. <i>Lethrinus ornatus</i> or Kanuping (Php 155.00-350.00 /kg)- supplies with the lowest prevailing price of Php 155.00 /kg were recorded in Region 9 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 350.00 /kg were recorded in Region 12 wherein the available supply were larger in size. 11. <i>Macrobrachium rosenbergii</i> or Ulang (Php 180.00 & 480.00 /kg) - supplies with the lowest prevailing price of Php 180.00 /kg were recorded in Region 9 wherein the said commodity were smaller in size. Meanwhile, supplies with the highest prevailing price of Php 480.00 /kg were recorded in Region 11 wherein the available supply were larger in size. 12. <i>Mercenaria</i> sp. or Tuway (Php 60.00-260.00 /kg) - supplies with the lowest prevailing price of Php 60.00/kg were recorded in Region 11 wherein the said commodity was smaller in size, hence, price is lower compared to Region 10. 13. <i>Nemipterus hexadon</i> or Suga (Php 140.00-360.00 /kg) -both the lowest and highest prevailing prices of Php 140.00/kg and Php 360.00/kg, respectively, were recorded in Region 8. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available. 14. <i>Nemipterus nematopus</i> or Bisugo (Php 240.00-380.00 /kg) -both the lowest and highest prevailing prices of Php 240.00/kg and Php 380.00/kg, respectively, were recorded in Region 4A. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available. 15. <i>Perna perna</i> or Tahong (Php 60.00-130.00 /kg) -both the lowest and highest prevailing prices of Php 60.00/kg and Php 130.00/kg, respectively, were recorded in Region NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available. 16. <i>Plectorhinchus polytaenia</i> or Lepti (Php 100.00-260.00 /kg)- both the lowest and highest prevailing prices of Php 100.00/kg and Php 260.00/kg, respectively, were recorded in Region 10. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available. 17. <i>Pseudorhombus</i> sp. or Dapa (Php 300.00 & 400.00 /kg) -both the lowest and highest prevailing prices of Php 300.00/kg and Php 400.00/kg, respectively, were recorded in Region NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available. 18. <i>Salmo salar</i> or Salmon (Meat sliced) (Php 400.00-880.00 /kg) -supplies with the lowest prevailing price of Php 400.00 /kg were recorded in Region 4A wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 880.00 /kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher. 19. <i>Selar</i> sp. or Matambaka (Php 200.00 & 360.00 /kg) -both the lowest and highest prevailing prices of Php 200.00/kg and Php 360.00 /kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available. 20. <i>Siganus spinus</i> or Danggit (Php 260.00 & 400.00 /kg) - supplies with the lowest prevailing price of Php 260.00 /kg were recorded in Region 10 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 400.00 /kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher. 21. <i>Thunnus obesus</i> or Barilis (Php 175.00-380.00 /kg) - supplies with the lowest prevailing price of Php 175.00 /kg were recorded in Region 9 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 380.00 /kg were recorded in CARAGA wherein the available supply were larger in size, hence, price was higher. 22. <i>Trichiurus japonicus</i> or Espada (Php 120.00-300.00 /kg) - supplies with the lowest prevailing price of Php 120.00 /kg were recorded in Region 11 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 300.00 /kg were recorded in Region 4A wherein the available supply were larger in size, hence, price was higher. 23. <i>Xiphias gladius</i> or Marlin (Php 200.00-500.00 /kg) - supplies with the lowest prevailing price of Php 200.00 /kg were recorded in Region 9 wherein the said commodity were sourced within the locality and smaller in size, hence, price was lower. Meanwhile, supplies with the highest prevailing price of Php 500.00 /kg were recorded in Region 12 wherein the available supply were larger in size, hence, price was higher.
