**Remarks/Market Observations:**

**The following observations were gathered from market personnel and vendors this week:**

- Minimal supply of fresh marine commodities was observed in the monitored markets this week. Some of the fish vendors obtained lower volumes of fishery commodities to ensure that all their stocks will be sold out by the end of the day. Moreover, the minimal availability of supplies of marine fishery commodities in the monitored markets may possibly be due to the following reasons:
  - Hampered fishing operations caused by the effect of trough of LPA and Northeast monsoon which brings strong rough coastal waters in Extreme Northern Luzon, Southern Luzon, Visayas, and Northern and Eastern section of Mindanao (source: DOST-PAGASA); and
  - The presence of full moon on 26 January 2024 (Friday) wherein fishes tend to go deeper making them hard to catch.
- Likewise, for medium-sized local-fresh galunggong lalaki (*Decapterus macrosoma*), minimal availability was observed in the monitored retail markets. Supplies of other variants like "balsa" (*Decapterus macarellus*) was also noted at the time of monitoring. Said supplies were sourced from Lucena (Quezon), Mindoro, Farmers market (wholesale), Navotas and Malabon Fish Ports.
- Supplies of medium to large-sized imported-frozen galunggong lalaki were prominently observed in the monitored markets this week. Fish vendors usually sell imported galunggong whenever there is an insufficient availability of local variants.
- For medium-sized alumahan (*Rastrelliger kanagurta*), minimal availability was observed among the monitored markets this week. Said supplies were chiefly from Navotas and Malabon Fish Ports.
- For aquaculture commodities (i.e., bangus and tilapia), sufficient supplies from the source areas were observed among the monitored markets. In fact, on 26 January 2024, abundant unloading of bangus (*Chanos chanos*) was observed at the market halls 3, 4, & 5 of Navotas Fish Port Complex. According to fish vendors, fish producers early harvest their bangus due to cold weather condition in the country brought by the Northeast monsoon "Amihan".
- Major source areas of the top fishery commodities in the monitored markets are as follows:
  - Retail
    - Bangus - Bulacan
    - Tilapia - Batangas
    - Local Galunggong - Malabon Fish Port
    - Imported Galunggong - Navotas Fish Port
    - Alumahan - Malabon Fish Port

**General Observations:**

**Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.**

- Glossogobius celebius* or Bitya - (Php200.00 - 420.00/kg) - Lowest prevailing price of Php200.00/kg is noted in Polo Public market wherein smaller size of the commodity was recorded as compared to the supplies noted in Marikina market which supplies observed were larger in size sourced from Lucena (Quezon), hence the offer relatively, higher.

(-) - Price Not Available During Price Monitoring  
 (\*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.  
 NA - Source Area not available during price monitoring

Markets 1-10 (Trabajo to Galas) - Monitored by BFAR-FIDSSD (CO) Enumerators  
 Markets 11-16 (Malabon Central to Ugong Valenzuela) - Monitored by BFAR-NCR Enumerators  
**Note:** No Price Monitoring Activity was conducted in Guadalupe market this week as currently no designated enumerator in the said market.
