(-) - Price and Volume not available during price monitoring
(*) - Actual Price - price data collected did not reach the minimum requirement of three (3) samples per commodity per market. This could be due to limited volumes or no available supplies at the time of monitoring.

REMARKS AND MARKET OBSERVATIONS

CAR

WEEK 1-JANUARY 1-5, 2024

Sufficient supply of marine fishery commodities was observed in Baguio City, Benguet market.

For aquaculture commodities, supply remained steady for the consuming public.

No price monitoring conducted in the all monitored markets except Baguio City, Benguet market due to the ongoing processing of enumerator’s contract.

WEEK 2-JANUARY 8-12, 2024

Supply of aquaculture commodities particularly bangus and tilapia continued to be available in the monitored markets this week.

Price variation may be affected by the varying sizes of available supply.

For marine fishery commodities, supplies were sourced from neighboring regions.

Commodities recorded were skipjack, bullet tuna, grouper, snapper, blue marlin tuna, shortfin scad and others.

No price monitoring activity conducted in Bangued, Abra as the assigned enumerator is on leave.

No price monitoring activity conducted in Lagawe, Ifugao, and Sta. Marcela Apayao due to the ongoing processing of enumerators contract.

WEEK 3-JANUARY 15-19, 2024

Stable supply of marine fishery commodities was observed in the monitored markets this week.

Commodities recorded were lapu-lapu, maya-maya, tuna, shortfin scad, and others.

Consequently, supply of aquaculture commodities (i.e., bangus and tilapia) were adequate.

No price monitoring conducted in Lagawe, Ifugao due to the participation of assigned enumerators on the "Orientation and Capacity Building of BFAR-SAAD Phase 2"

WEEK 4-JANUARY 22-26, 2024

Since CAR is a land-locked region, supplies of marine fishery commodities were sourced from neiboring regions.

Commodities recorded were snapper, blackfin tuna, blue marlin tuna, and others.

Prices may fluctuate due to varying source areas of supplies.

For bangus and tilapia, supplies continued to be sufficient for the consumers.

WEEK 5-JANUARY 29-FEBRUARY 2, 2024

Sufficient availability of marine fishery commodities was observed in the monitored market today.

Supplies in La Trinidads and Bontoc Mt. Province were sourced from dealers or traders of Baguio, City.

Likewise, for aquaculture commodities such as bangus and tilapia, steady supply was noted.

Price may be affected by the commodity's size and layers of brokers handling the commodity before reaching the market.

R1

WEEK 1-JANUARY 1-5, 2024

Steady supply of fishery commodities was observed.

Among the commodities recorded were bangus (*Chanos chanos*), tilapia (*Oreochromis niloticus*), galunggong (*Decapterus spp.*), and others.

Presence of frozen galunggong were also reported in the province of Ilocos Sur and Pangasinan at Php100.00/kg - Php240.00/kg. Difference in price may be due to the varying sizes of the commodity.

WEEK 2-JANUARY 8-12, 2024

Supplies of top fishery commodities (i.e., bangus, tilapia, galunggong) were consistently available in the monitored markets.

However, in Laoag City, Ilocos Norte, no supply of marine fishery commodities was observed. This might be due to the occurrence of Northeast monsoon or "Amihan".

Presence of imported-frozen galunggong was observed in Ilocos Sur and Pangasinan with recorded price ranging from Php150.00/kg to Php200.00/kg. Difference in price may be attributed to the varying sizes of the commodity.

WEEK 3-JANUARY 15-19, 2024

Ample volume of top fishery commodities (i.e., bangus, tilapia, and galunggong) was observed.

For imported galunggong, supplies were available in Ilocos Sur and Pangasinan with recorded price of Php160.00/kg - Php240.00/kg. Difference in price might be attributed to the varying sizes.

WEEK 4-JANUARY 22-26, 2024

Sufficient supplies of marine fishery commodities was observed among the monitored markets this week.

Likewise, for aquaculture commodities such as bangus and tilapia, supplies remained ample.

Nonetheless, presence of imported galunggong was available in the wet markets of Ilocos Sur and Pangasinan. The recorded price ranged from Php160.00/kg to Php220.00/kg. Price difference may be due to the varying sizes of supplies.

WEEK 5-JANUARY 29-FEBRUARY 2, 2024

Constant supply of bangus (*Chanos chanos*), tilapia (*O. niloticus*) and galunggong (*Decapterus spp.*) was observed this week.

Availability of imported galunggong were still noted in Ilocus Sur and Pangasinan Market. The recorded price ranged from Php150.00/kg to Php240.00/kg. Difference in prices may be due to the varying sizes of the commodity.

TOP FISHERY COMMODITIES																			NATIONAL			
	Scientific Name	English Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	CARAGA	NCR	Prevailing Price (Php/kg)	High	Low
R2 WEEK 1-JANUARY 1-5, 2024 Limited supply of fresh fishery commodities was observed during price monitoring in the monitored markets. This might be because fishing operations have been hampered by the unfavorable weather during the past few days. WEEK 2-JANUARY 8-12, 2024 Steady supply of fishery commodities was observed among the monitored markets. WEEK 3-JANUARY 15-19, 2024 Steady supply of fishery commodities was observed. WEEK 4-JANUARY 22-26, 2024 High supply of tilapia was observed in the monitored markets. This resulted to the decreased in price specifically in Don Domingo Public Market. Low demand for fishery commodities was noted at the time of monitoring. WEEK 5-JANUARY 29-FEBRUARY 2, 2024 Stable supply of fishery commodities was observed in all the monitored wet markets this week.																						
R3 WEEK 1-JANUARY 1-5, 2024 Limited supply of fishery commodities was observed at the time of monitoring in the markets. In fact, some of the prices of fishery commodities increased. WEEK 2-JANUARY 8-12, 2024 As observed, supplies of fishery commodities in the monitored markets continued to be available for the consuming public. No price data in the Province of Nueva Ecija and Bulacan due to late submission of report. WEEK 3-JANUARY 15-19, 2024 Steady supply of fishery commodities was observed. WEEK 4-JANUARY 22-26, 2024 Steady supply of fishery commodities was observed this week. WEEK 5-JANUARY 29-FEBRUARY 2, 2024 Steady and adequate supply of fishery commodities was observed in the monitored markets.																						
R4A WEEK 1-JANUARY 1-5, 2024 Adequate supply of fishery commodities was observed among the monitored markets this week. Nonetheless, prices may be affected by the varying quality (in terms of sizes and freshness) and source areas. No price monitoring activity conducted in Cavite due to the ongoin processing of enumerator's contract. WEEK 2-JANUARY 8-12, 2024 Sufficient supply of marine fishery commodities was still observed among the monitored markets this week. Fluctuation of price may be influenced by the commodity's size, volume of supply, and source areas. WEEK 3-JANUARY 15-19, 2024 Availability of fresh marine commodities remained adequate in all monitored markets this week. Price changes could be due to the market demand, commodity's size, volume of supply, source area, and other natural phenomena. The low price of galunggong in Lemery Public Market and tamban in Lucena City Public Market was due to the abundance in supply. WEEK 4-JANUARY 22-26, 2024 In general, adequate availability of marine fishery commodities was observed in the monitored markets. Fluctuation of price may be influenced by several factors such as the market demand, commodity's size, and volume of supply. The low price of "tamban" in Antipolo City Public Market and Lucena City Public Market was due to the abundance in supply. However, the price of galunggong (<i>Decapterus</i> spp.) in the four (4) monitored markets was high due to low supply because of "Amihan". WEEK 5-JANUARY 29-FEBRUARY 2, 2024 Overall, abundant supply of marine fishery commodities was noted in the monitored retail markets this week. In fact, high supply of tamban was observed in Antipolo City Public Market and Lucena Cit Public Market.																						
R4B WEEK 1-JANUARY 1-5, 2024 Minimal supply of fishery commodities was observed in Occidental Mindoro and South Palawan this week. This may be due to the unfavorable weather condition (strong winds). Some of the fishery commodities increased in price. WEEK 2-JANUARY 8-12, 2024 In general, sufficient supply of fishery commodities was observed in the monitored markets. The high recorded price in some of the monitored markets could be due to the logistic cost. WEEK 3-JANUARY 15-19, 2024 Sufficient supply of fishery commodities was observed in the monitored wet markets this week. Prices may be affected by the logistic costs. WEEK 4-JANUARY 22-26, 2024 Sufficient supply of fishery commodities was observed in the monitored markets. Even so, prices may still be affected by the transportation expenses of the commodity. WEEK 5-JANUARY 29-FEBRUARY 2, 2024 Sufficient availability of marine fishery commodities was observed among the monitored markets this week. Even so, prices of fishery commodities may be affected by the logistic cost.

R5																						
WEEK 1-JANUARY 1-5, 2024																						
Ample availability of fishery commodities was observed in the monitored markets.																						
No supply of frozen commodities were noted this week.																						
WEEK 2-JANUARY 8-12, 2024																						
Overall, sufficient availability of bangus and tilapia was observed this week.																						
For marine fishery commodities, minimal but sufficient supply was observed. This might be due to the unfavorable weather condition.																						
WEEK 3-JANUARY 15-19, 2024																						
Generally, high supply of marine fishery commodities (i.e., matambaka, burot, asuhos, barracuda, etc.) was observed in the monitored markets this week.																						
Prices may still be affected by the quantity of supply and quality (in terms of sizes and freshness).																						
For aquaculture commodities such as bangus, tilapia, and hipon, low supply coming from Calabanga and Pasacao was noted.																						
Presence of imported-frozen commodities (i.e., island mackerel and hiwas) was observed. These were sourced from Manila.																						
WEEK 4-JANUARY 22-26, 2024																						
Minimal but sufficient supply of marine fishery commodities was observed among the monitored markets this week. This might be due to the bad weather condition hampering fishing operations.																						
Among the commodities recorded were golden threadfin bream, common silver biddy, giant trevally, and others.																						
Presence of frozen fishery commodities such as roundscad, squid, island mackerel, and moonfish sourced from Manila was observed this week.																						
WEEK 5-JANUARY 29-FEBRUARY 2, 2024																						
Sufficient supply of marine fishery commodities was observed among the monitored retail markets this week.																						
Despite the sufficiency of local commodities, availability of imported fishes like "tulingan" and "pusit-pula" from Manila was recorded.																						
No price monitoring conducted in Masbate market due to the on-site inspection task of the assigned enumerator.																						
R6																						
WEEK 1-JANUARY 1-5, 2024																						
Sufficient supply of fishery commodities was noted among all the monitored makets this week.																						
Commodities recorded were burot, sardines, tulingan, squid, shrimp, grouper, and others.																						
No price monitoring conducted in the province of Capiz.																						
WEEK 2-JANUARY 8-12, 2024																						
Sufficient supply of fishery commodities was observed among the monitored markets.																						
Most of the commodities sold in the Province of Antique and Iloilo Central Market were pelagic fishes (e.g., dalinuan, dalumpang, belong-belong, lison, mat-an, etc.)																						
No supply of shellfish in the Province of Capiz due to the occurrence of Red Tide.																						
WEEK 3-JANUARY 15-19, 2024																						
Limited availability of marine fishery commodities was observed in the monitored markets this week. This might be due to the bad weather condition which hampers fishing operations.																						
Commodities recorded were roundscad, snapper, Indian mackerel, skipjack tuna, grouper, squid, and others.																						
For bangus and tilapia, supplies remained stable for the consuming public.																						
No shellfish was recorded in the monitored markets due to the occurrence of Red Tide.																						
WEEK 4-JANUARY 22-26, 2024																						
Overall, due to unfavorable weather conditions, lesser availability of marine fishery commodities as compared to previous monitoring was observed this week.																						
Commodities recorded were round scad, yellowfin tuna, bullet tuna, squid, snapper, and others.																						
No shellfish available in the province of Capiz due to the occurrence of Red Tide.																						
For aquaculture commodities (i.e., bangus and tilapia), steady and sufficient supplies were observed at the time of monitoring.																						
WEEK 5-JANUARY 29-FEBRUARY 2, 2024																						
Abundant supply of marine fishery commodities was observed at the time of monitoring this week.																						
Commodities recorded were skipjack tuna, bullet tuna, yellowfin tuna, grouper, and others.																						
For aquaculture commodities (i.e., bangus and tilapia), supplies remained available in the monitored markets.																						
R7																						
WEEK 1-JANUARY 1-5, 2024																						
Sufficient supply of fishery commodities was observed in the monitored markets this week.																						
Prices may be affected by the quality of fish (size and freshness) and logistic cost.																						
No price monitoring activity in Maasin market due to the ongoing processing of enumerator's contract.																						
WEEK 2-JANUARY 8-12, 2024																						
Due to the unfavorable weather condition, minimal availability of marine fishery commodities.																						
WEEK 3-JANUARY 15-19, 2024																						
Due to the inclement weather condition brought about by the Northeast Monsoon or "Amihan", limited supply of marine fishery commodities was observed.																						
WEEK 4-JANUARY 22-26, 2024																						
Limited availability of marine fishery commodities was observed in the monitored markets this week.																						
The reason for this could be due to the unfavorable weather condition hampering fishing operations.																						
Also, the occurrence of full moon on January 25, 2024 wherein fishes tends to go deeper making them hard to catch.																						
WEEK 5-JANUARY 29-FEBRUARY 2, 2024																						
Minimal supplies of marine fishery commodities were observed in the monitored markets this week. The reason for this might be due to the unfavorable weather conditon hampering fishing operations.																						
R8																						
WEEK 1-JANUARY 1-5, 2024																						
As observed, sufficient supply of fishery commodities was observed in all the monitored markets.																						
Fluctuation of prices may be attributed to the varying sizes and source areas.																						
WEEK 2-JANUARY 8-12, 2024																						
Sufficient supply of fishery commodities was observed during the conduct of price monitoring in the monitored markets.																						
Price variation may be influenced by the varying sizes and source areas.																						
No price monitoring activity in Maasin market due to the ongoing renewal of contract.																						
No price monitoring activity in Ormoc and Tacloban due to the conduct of other office activities.																						
WEEK 3-JANUARY 15-19, 2024																						
Minimal but sufficient supply of marine fishery commodities was observed in the monitored markets. More specifically, in Guiuan, Samar, coast guard advised the small-scale fishermen to prevent from fishing. This is due to the bad weather condition.																						
Price increment of some fishery commodities could be due to low supply.																						
No price monitoring activity in Tacloban market due to equally important task of the office.																						
WEEK 4-JANUARY 22-26, 2024																						
In general, despite the inclement weather condition, supplies of marine fishery commodities were sufficient this week.																						
However, in Guiuan, Samar, coast guard still advised the small-scale fishermen to prevent from fishing due to the bad weather condition.																						
Prices may still vary depending on the commodity's size, source areas, and quantity of supplies.																						
WEEK 5-JANUARY 29-FEBRUARY 2, 2024																						
In general, sufficient supply of fishery commodities was noted during the conduct of price monitoring.																						
No price monitoring was conducted in Massin market due to unforeseen circumstances in the family.																						

TOP FISHERY COMMODITIES																		NATIONAL				
	Scientific Name	English Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	CARAGA	NCR	Prevalling Price (Php/kg)	High	Low
R9 WEEK 1-JANUARY 1-5, 2024 Minimal quantity of fishery commodities was observed among all monitored markets. This could be due to the bad weather condition hampering fishing operations. As a result, prices of some fishery commodities increased. Nevertheless, abundant supply of small-sized tamban (<i>Sardinella lemuru</i>) was observed in Zamboanga del Sur and Zamboanga Peninsula with recorded price ranging from Php20.00/kg to Php30.00/kg. WEEK 2-JANUARY 8-12, 2024 Lesser volume and variety of fishery commodities was observed in the monitored markets this week. The reason for this could be due to the hampering operation of fishermen caused by the strong winds in the fishing grounds brought about by Amihan. Nonetheless, prices may still vary depending on the commodity's size and freshness. WEEK 3-JANUARY 15-19, 2024 Due to the strong winds in the fishing ground, minimal unloading of marne fishery commodities was observed this week. Prices of some commodities increased which might possibly be due to the hampered fishing operation caused by the unfavorable weather condition. Even so, adequate supply of small-sized tamban (<i>Sardinella lemuru</i>) was observed in Zamboanga Sibugay with recorded price ranged from Php25.00/kg to Php30.00/kg. WEEK 4-JANUARY 22-26, 2024 As compared to the previous monitoring week, lesser supplies of marine fishery commodities were observed at the monitored markets this week. This might be affected by the occurrence of full moon on 25 January 2024. Also, the strong winds brought about by "Amihan" which hampers fishing operations may have an effect on the decreased in supplies. Prices may still vary depending on the commodity's size and quality (in terms of freshness). WEEK 5-JANUARY 29-FEBRUARY 2, 2024 Due to the trough of LPA, minimal availability of marine fishery commodities was observed in the monitored markets this week. As a result, high price of some fishery commodities was noted. Nonetheless, prices may vary depending on the commodity's size and freshness.																						
R10 WEEK 1-JANUARY 1-5, 2024 Stable supply of bangus (<i>Chanos chanos</i>), tilapia (<i>Oreochromis niloticus</i>), and galunggong (<i>Decapterus</i> spp.) was observed among the monitored retail markets this week. Price changes may vary depending on the logistic cost. WEEK 2-JANUARY 8-12, 2024 Stable supply of bangus, tilapia, and galunggong was observed. Fluctuation of price might be due to the oil price as well as the quantity of supply available in the monitored market. WEEK 3-JANUARY 15-19, 2024 Due to the presence of shearline, minimal but sufficient supply of marine fishery commodities was observed. For aquaculture commodities such as bangus and tilapia, supplies were sufficient to cater to the demand of the buying public. WEEK 4-JANUARY 22-26, 2024 Supplies of aquaculture commodities such as bangus and tilapia were stable among the monitored markets. For marine fishery commodities, minimal availability were observed this week which might be due to the bad weather conditon caused by shearline. Prices may fluctuate due to the oil price which affects logistic cost. WEEK 5-JANUARY 29-FEBRUARY 2, 2024 Abundant quantity of bangus (<i>Chanos chanos</i>), tilapia (<i>Oreochromis niloticus</i>) and galunggong (<i>Decapterus</i> spp.) was observed. However, prices may still be affected by the logisctic cost.																						
R11 WEEK 1-JANUARY 1-5, 2024 Due to the bad weather condition, minimal supply of fishery commodities was observed in the monitored markets. Some of the fishery commodities increased in price due to the minimal availability of supplies. WEEK 2-JANUARY 8-12, 2024 Limited supply of marine fishery commodities was observed. This might possibly be due to the bad weather condition hampering fishing operation of the fishermen. Even so, supply of aquaculture commodities such as bangus and tilapia were sufficient to cater to the demand of the buying public. WEEK 3-JANUARY 15-19, 2024 Minimal supply of fishery commodities was observed in the monitored markets. This might be due to the constant bad weather condition. WEEK 4-JANUARY 22-26, 2024 Due to the incessant rainfall in Davao City, Davao Oriental, and Davao del Norte, lesser availability of fishery commodities was observed. Some of the price of fishery commodities in the aforementioned provinces moderately increased as compared last week. However, in other provinces like Davao de Oro, Davao del Sur and Davao Occidental, supplies and prices remained stable. WEEK 5-JANUARY 29-FEBRUARY 2, 2024 Inadequate supply of marine fishery commodities was noted in all monitored wet markets due to the continuous bad weather conditions in some areas of Mindanao.																						
R12 WEEK 1-JANUARY 1-5, 2024 Despite the ample availability of supply of fishery commodities, prices of some fishery commodities increased which might be due to the celebration of holiday season. WEEK 2-JANUARY 8-12, 2024 Overall, sufficient supply of fishery commodities was observed. Commodities recorded were grouper, bullet tuna, borot, yellowfin tuna, and others. Prices may vary depending on the quality (in terms of size and freshness) and quantity of supplies available in the monitored markets. WEEK 3-JANUARY 15-19, 2024 Unstable supply of fishery commodities was observed in Glan and General Santos Fish Port Complex. Reason for this could be due to the inclement weather condition. WEEK 4-JANUARY 22-26, 2024 Due to the unfavorable weather conditions, a minimal but sufficient supply of marine fishery commodities was observed this week. Some of the prices of displayed fish slightly increased due to minimal availability, which might be due to the hampered fishing operations caused by the bad weather conditions. WEEK 5-JANUARY 29-FEBRUARY 2, 2024 Unstable supply of marine fishery commodities was observed among the monitored markets this week. This might be due to the bad weather condition affecting the fishing operations. Among the commodities recorded in Koronadal market were tulingan, burot, and others.																						
R13 WEEK 1-JANUARY 1-5, 2024 Due to the inclement weather condition, minimal supply of fresh marine commodities were observed in the monitored markets. WEEK 2-JANUARY 8-12, 2024 Limited supply of marine fishery commodities was still observed in the monitored markets this week. WEEK 3-JANUARY 15-19, 2024 Limited supply of fishery commodities was observed. WEEK 4-JANUARY 22-26, 2024 Limited supply of fishery commodities was observed among the monitored markets this week. WEEK 5-JANUARY 29-FEBRUARY 2, 2024 Still, limited availability of marine fishery commodities was observed among the monitoring markets this week. This might be due to the bad weather condition caused by the occurrence of LPA in the Southeastern Mindanao.

Scientific Name	English Name	Local Name	CAR	1	2	3	4A	4B	5	6	7	8	9	10	11	12	CARAGA	NCR	Prevailing Price (Php/kg)	High	Low
NCR																					
The following observations were gathered from market vendors and administrators for the month of January:																					
1. In general, low volume of supplies for fresh marine commodities were observed among the monitored retail markets throughout the whole month. This may be attributed to the following: a) ongoing implementation of Closed Fishing Season in Northeastern Palawan (major fishing ground) for local galunggong from Nov 1 to Jan 31, Visayan Sea for sardines, herrings, and mackerels from Nov 15 to Feb 15 and Zamboanga Peninsula for sardines from Dec 1 to Mar 1; b) cold weather condition in the country brought about by the shear line affecting eastern section of Visayas and Mindanao and Northeast monsoon affecting Luzon; c) hampered fishing operations caused by the effect of trough of LPA and Northeast monsoon which brings strong rough coastal waters in Extreme Northern Luzon, Southern Luzon, Visayas, and Northern and Eastern section of Mindanao (source: DOST-PAGASA) presence of full moon on 26 January 2024 (Friday) wherein fishes tend to go deeper making them hard to catch during the 4th week of the month.																					
2. Limited supply of local-fresh galunggong lakai were still reported at the monitored retail markets this month due to the ongoing implementation of Closed Fishing Season for galunggong in Northeastern Palawan (major source area) on 1 November 2023 until 31 January 2024. This resulted to a relatively high prevailing retail price of Php320.00/kg for this month. There are other local galunggong variants like “balsa” (<i>Decapterus macarellus</i>), “babae” (<i>Decapterus russelli</i>) and “burot” (<i>Decapterus kurroides</i>) recorded in some of the monitored retail markets this month.																					
3. Most of the supplies available for galunggong at the monitored retail markets were imported-frozen galunggong. Higher demand for imported-frozen galunggong were observed due to the limited supply of local galunggong this month.The prevailing retail price is at Php200.00/kg this month. Other imported-frozen commodities like pampano, salmon mackarel, salmon head and belly, chabeta, pusit kalawang, and tulingan were noted in the monitored markets.																					
4. For tilapia, the prevailing retail price remained at Php160.00/kg this month. Supplies remianed stable and sufficient among the monitored markets. There are some buyers who prefer tilapia sourced from Batangas due to the commodity’s quality (in terms of taste and appearance). There is still a Php20-30/kg price difference between live and fresh-chilled tilapia.																					
5. The prevailing retail price of bangus remained at Php180.00/kg this month. According to vendors, supplies remained stable and sufficient at the monitored retail markets. According to fish vendors, fish producers early harvest their bangus due to cold weather condition in the country brough by the Northeast monsoon “Amihan”. There are still some vendors in Muñoz, Trabaja, Galas, and Tandang Sora who prefer selling larger size of bangus due to higher demand from consumers.																					
6. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:																					
a. Bangus - Bulacan, Pangasinan																					
b. Tilapia - Batangas, Pampanga																					
c. Local Galunggong - Navotas Fish Ports, Lucena Quezon																					
d. Imported Galunggong - Navotas Fish Port																					
e. Alumahan - Malaban Fish Port																					
General Observation																					
Fluctuation in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity’s size, quality, volumes of available supply, source area, as well as the weather condition and other natural phenomena.																					
1. <i>Alepes vari</i> or Salay (Php 300.00 & 650.00 /kg) - supplies with the lowest prevailing price of Php 300.00 /kg were recorded in 4A wherein the said commodity were sourced within the locality and smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 650.00 /kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.																					
2. <i>Aluterus monoceros</i> or Siwarik (Php 240.00-800.00 /kg) - supplies with the lowest prevailing price of Php 240.00 /kg were recorded in 4B wherein the said commodity were sourced within the locality and smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 800.00 /kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.																					
3. <i>Amblygaster sirm</i> or Turay (Php 100.00 & 200.00 /kg) - supplies with the lowest prevailing price of Php 100.00 /kg were recorded in 10 wherein the said commodity were sourced within the locality and smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 200.00 /kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.																					
4. <i>Carangoides ferdau</i> or Talakitok (Php 300.00-500.00 /kg) - supplies with the lowest prevailing price of Php 300.00 /kg were recorded in Region 3 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 500.00 /kg were recorded in Region 11 wherein the available supply were larger in size, hence, price was higher.																					
5. <i>Carangoides fulvoguttatus</i> or Talakitok (Php 250.00-500.00 /kg) - supplies with the lowest prevailing price of Php 250.00 /kg were recorded in Region 9 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 500.00 /kg were recorded in Region 11 wherein the available supply were larger in size, hence, price was higher.																					
6. <i>Carangoides</i> spp. or Talakitok (Php 250.00 & 400.00 /kg) - supplies with the lowest prevailing price of Php 250.00 /kg were recorded in Region 4B wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 400.00 /kg were recorded in Region 12 wherein the available supply were larger in size, hence, price was higher.																					
7. <i>Cheilopogon heterurus</i> or Flying fish (Php 100.00 & 230.00 /kg) - supplies with the lowest prevailing price of Php 100.00/kg were recorded in Region 1 wherein the said commodity was smaller in size, hence, price is lower compared to Region 10.																					
8. <i>Dendrophysa russelii</i> or Alakaak (Php 200.00-300.00 /kg) - supplies with the lowest prevailing price of Php 200.00/kg were recorded in NCR wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.																					
9. <i>Gerres oyena</i> or Latab (Php 120.00-350.00 /kg) -both the lowest and highest prevailing prices of Php 120.00/kg and Php 350.00/kg, respectively, were recorded in Region 5. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																					
10. <i>Glossogobius celebius</i> or Biya (Php 200.00-420.00 /kg) -both the lowest and highest prevailing prices of Php 200.00/kg and Php 420.00/kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																					
11. <i>Hemiramphus sp.</i> or Salurasid (Php 150.00-280.00 /kg) - supplies with the lowest prevailing price of Php 150.00 /kg were recorded in Region 8 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 280.00 /kg were recorded in Region 11 wherein the available supply were larger in size, hence, price was higher.																					
12. <i>Leionathus splendens</i> or Sapsap (Php 80.00-450.00 /kg) - supplies with the lowest prevailing price of Php 80.00 /kg were recorded in Region 11 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 450.00 /kg were recorded in Region 4A wherein the available supply were larger in size, hence, price was higher.																					
13. <i>Macrobrachium rosenbergii</i> or Ulang (Php 160.00-500.00 /kg) - supplies with the lowest prevailing price of Php 160.00 /kg were recorded in Region 9 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 500.00 /kg were recorded in Region 3 wherein the available supply were larger in size, hence, price was higher.																					
14. <i>Naso unicornis</i> or Surahan (Php 200.00-340.00 /kg) - supplies with the lowest prevailing price of Php 200.00/kg were recorded in Region 8 wherein the said commodity was smaller in size, hence, price is lower compared to Region 11.																					
15. <i>Naso hexacanthus</i> or Gangis (Php 140.00-360.00 /kg) -both the lowest and highest prevailing prices of Php 140.00/kg and Php 360.00/kg, respectively, were recorded in Region 11. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																					
16. <i>Nemipterus bathybius</i> or Bisugo (Php 300.00-490.00 /kg) - supplies with the lowest prevailing price of Php 300.00/kg were recorded in NCR wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.																					
17. <i>Nemipterus nematophorus</i> or Saguision (Php 350.00 & 450.00 /kg) - supplies with the lowest prevailing price of Php 350.00/kg were recorded in Region 8 wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.																					
18. <i>Nemipterus nemurus</i> or Bisugo (Php 200.00 & 300.00 /kg) -both the lowest and highest prevailing prices of Php 200.00/kg and Php 300.00/kg, respectively, were recorded in Region 9. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																					
19. <i>Parulirus longipes</i> or Banagan(Php 600.00-700.00 /kg) -both the lowest and highest prevailing prices of Php 600.00/kg and Php 700.00/kg, respectively, were recorded in Region 8. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																					
20. <i>Rastrelliger</i> sp. or Hasa-hasa (Php 100.00-240.00 /kg) - supplies with the lowest prevailing price of Php 100.00 /kg were recorded in Region 9 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 240.00 /kg were recorded in Region 3 wherein the available supply were larger in size, hence, price was higher.																					
21. <i>Salmo salar</i> or Salmon (Meat sliced) (Php 180.00-860.00/kg) - both the lowest and highest prevailing prices of Php 180.00/kg and Php 860.00/kg, respectively, were recorded in CAR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																					
22. <i>Siganus virgatus</i> or Daraobao (Php 180.00 & 350.00 /kg) - supplies with the lowest prevailing price of Php 180.00/kg were recorded in Region 8 wherein the said commodity was smaller in size, hence, price is lower compared to Region 1.																					
23. <i>Siganus vermiculatus</i> or Malaga (Php 250.00 & 400.00 /kg) - supplies with the lowest prevailing price of Php 250.00/kg were recorded in Region 1 wherein the said commodity was smaller in size, hence, price is lower compared to Region 2.																					
24. <i>Sillago sihama</i> or Asohos (Php 140.00-360.00 /kg) - supplies with the lowest prevailing price of Php 140.00 /kg were recorded in 9 wherein the said commodity were sourced within the locality and smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 360.00 /kg were recorded in NCR wherein the available supply were sourced from other regions and larger in size, hence, price was higher.																					
25. <i>Teuthida</i> sp. or Pusit (Php 400.00-500.00/kg) - both the lowest and highest prevailing prices of Php 400.00/kg and Php 500.00/kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																					
26
