**Remarks/Market Observations:**

The following observations were gathered from market personnel:

- Minimal but still adequate unloading of fresh marine commodities was observed at Navotas Fish Port (wholesale) this week. More specifically, for local fresh galunggong lalaki (*Decapterus macrosoma*), supplies sourced from Zambales, Mindoro, and Palawan were available.
- Despite the constant availability of local variants, supplies of medium to large-sized imported-frozen galunggong lalaki from Vietnam were observed at Navotas Fish Port this week at a prevailing wholesale price of Php130.00/kg. Supply of imported-frozen galunggong babae was also noted at the fish port.
- For alumahan (*Rastrelliger kanagurta*), supplies remained unpredictable as only one (1) broker unloaded the commodity at the fish port with an actual wholesale price of Php220.00/kg sourced from Masbate Province.
- For aquaculture commodities (i.e., bangus and tilapia), adequate unloading was still observed at Navotas Fish Port this week. Specifically, for bangus (*Chanos chanos*), supplies available were derived from Bulacan and Pangasinan. Nonetheless, it was observed that supplies from Pangasinan command a better price compared to Bulacan due to difference in quality (in terms of size and taste).
- For tilapia, supplies at the fish port were mostly from Batangas. This might be due to the consumer's demand, as majority of the consumers/buyers prefer tilapia from Batangas over Pampanga due to better quality (in terms of taste).
- Major source areas of the top fishery commodities in the monitored wholesale market are as follows:
  - Bangus -Bulacan
  - Tilapia - Batangas
  - Local Galunggong- Zambales
  - Alumahan- Masbate
  - Imported galunggong - Vietnam

(-) - Price and Volume not available during price monitoring

(\*\*) - Actual Price - refers to the prices in the absence of the most frequently occurring value per fresh fishery commodity per sampling size at a given time.
