<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> Overall, supply of fresh marine commodities this week remained sufficient in the monitored retail markets. Commodities recorded were matangbaka (<i>Selar crumenophthalmus</i>), pusit bisaya (<i>Uroteuthis sp.</i>), lapu-lapu (<i>Epinephelus sp.</i>), maya-maya (<i>Lutjanus spp.</i>), talakitok (<i>Caranx sp.</i>), sapsap (<i>Leiognathus sp.</i>), moonfish (<i>Mene maculata</i>), bisugo (<i>Nemipterus sp.</i>) and others. Consequently, for local-fresh galunggong lalaki (<i>Decapterus macrosoma</i>), supply continued to be stable, with majority of which were medium sized comprised of 11-20 pcs/kg. Supplies were sourced mainly from Malabon Fish Port, Navotas Fish Port, and Lucena (Quezon). Other retail markets obtained their supplies from different provinces (i.e. Palawan, Mindoro, Zambales, Romblon and etc.). Local galunggong variants like "balsa" (<i>Decapterus macarellus</i>), "galunggong-babae" (<i>Decapterus russelli</i>), and "burot" (<i>Decapterus kurroides</i>) were also noted in some of the monitored retail markets this week. Due to the constant availability of local galunggong variants, minimal supply of imported-frozen galunggong lalaki was observed this week. In fact, only Quinta market was noted with supply. The availability of the imported galunggong in the said market could be due to the existing demand from buyers with food stalls "Carinderia" because of its uniform and bigger size at affordable price. Other imported-frozen commodities recorded this week were galunggong babae, pompano, salmon mackerel, salmon head & belly, and pusit kalawang. For alumahan (<i>Rastrelliger kanagurta</i>), sufficient availability of the commodity was observed in the monitored retail markets this week. Said supplies were mostly sourced from Quezon Province, Navotas and Malabon Fish Ports. For medium-sized bangus (<i>Chanos chanos</i>), supply remained stable to cater the demand of the consuming public. However, some markets like Tandang Sora, Trabajo, Quinta, Pasig market and others prefer selling larger bangus (1pc/kg) due to higher demand from consumers. Said supplies were dominantly sourced from Pangasinan and Bulacan. For medium-sized tilapia (<i>Oreochromis niloticus</i>), sufficient supply from Batangas and Pampanga was also observed in all the monitored retail markets this week. Nonetheless, there's Php10-30/kg difference between sold live tilapia and fresh-chilled and between tilapia sourced from Batangas and Pampanga. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> Bangus - Pangasinan, Bulacan Tilapia - Batangas, Pampanga Local Galunggong - Lucena, Navotas & Malabon Fish Ports <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Kappaphycus alvarezii</i> - Guso - (Php70.00 - Php280.00) - lowest prevailing price of Php70.00/kg were recorded at Navotas retail market 3,4,5 where supplies were sourced directly from Navotas Fish Port, hence, the lower price.
