I. INTRODUCTION

The Bureau of Fisheries and Aquatic Resources (BFAR) under the Department of Agriculture is mandated for the protection, conservation and proper management of the Philippines marine resources. A monitoring Control and Surveillance Program have been implemented by BFAR in order to properly monitor and secure these resources. To further intensify the MCS implementation and its components, BFAR have recently amended the Republic Act 8550 through the passage of RA 10654 – “An Act to Prevent, Deter and Eliminate Illegal, Unreported and Unregulated Fishing, Amending RA8550”.

Observers is widely recognized as an effective means of collecting information necessary for the monitoring, assessment and enforcement activities required to implement an ecosystem-based approach to fisheries management. Observer Programs offer an opportunity to obtain scientific data directly from fishing operations. They provide important scientific information on target catch, non-target catches (including incidental catch of seabirds, marine mammals and turtles), and discards. Observers are primarily deployed when more detailed information than can be provided by logbooks is required and when fishing is conducted in areas that are environmentally sensitive.

Started October 2018, the BFAR with the Philippine Fisheries Observer Program implemented the Fisheries Administrative Order 261 Entitled: “Rules and Regulations on Fisheries Observer Programme (FOP) in the Philippines and in distant water fishing targeting straddling and highly migratory fish stocks” covered 50 to above 500 (GT) gross tonnages Philippine commercial fishing vessels Ring Net and Purse seine operating within PH Exclusive Economic Zone, High Seas, or in waters of other coastal states are required 100% fisheries observer coverage. At present, more than 300 registered fishing vessels are targeted to be covered based on data from the BFAR Fishing Vessel Licensing Electronic System (FELIS). This observer deployment coverage will provide primary and accurate information on the fishing catch, effort, and practice of a wide range of vessels operating inside and outside the Philippine waters and will serve as the basis for the formulation of fisheries management policy by fisheries managers, research organizations, environmental agencies, and the fishing industry.

The Philippines is a member of the Western and Central Pacific Commission (WCPFC), as of January 1, 2017, following the Agreed Minimum Standards and Guidelines of the Regional Observer Programme, the commission mandated that each authorized observer program ensure that observers from their program will be provided, before any boarding for a trip, with an approved independent two-way communication satellite device and a waterproof personal life-saving beacon to ensure that observers must be able to perform their duties without interference and in a safe working environment, free from hazards. To ensure the safety of the observers at sea and to meet these standards, the PFOMPO will procure additional Two-Way Communication Devices for its active observers. These devices will ensure that the Management Office can track and regularly communicate to its observers onboard commercial fishing vessels whether operating domestically or on the high seas.

II. OBJECTIVES

- To comply with the requirement of the agreed minimum standard for Regional Observe Programs under the Western and Central Pacific Fisheries Commission (WCPFC).
- To protect and ensure the safety of fisheries observers onboard commercial fishing vessels and distress at sea.
