(-) - Price and Volume not available during price monitoring

(\*) - Actual Price - refers to the prices in the absence of the most frequently occurring value per fresh fishery commodity per sampling size at a given time.

#### REMARKS AND MARKET OBSERVATIONS

##### CAR

###### WEEK 1- FEBRUARY 5-9, 2024 - WEEK 4- FEBRUARY 26- MARCH 1, 2024

Overall, steady supplies of marine fishery commodities were observed among the monitored markets this month.

Commodities available in the monitored markets were delivered by the traders.

Nonetheless, prices may still differ depending on the logistic cost, and number of brokers handling the commodity before reaching the market, and quality (in terms of size).

##### R1

###### WEEK 1- FEBRUARY 5-9, 2024 - WEEK 4- FEBRUARY 26- MARCH 1, 2024

Steady and sufficient availability of marine fishery commodities was observed in the monitored markets this month.

Among the fishery commodities recorded were bangus, tilapia, galunggong, squid, hipon, and others.

Supplies of imported-frozen galunggong were observed available in Ilocos Sur and Pangasinan.

##### R2

###### WEEK 1- FEBRUARY 5-9, 2024 - WEEK 4- FEBRUARY 26- MARCH 1, 2024

Generally, supplies of marine fishery commodities were stable among the monitored markets this month.

##### R3

###### WEEK 1- FEBRUARY 5-9, 2024 - WEEK 3- FEBRUARY 19-23, 2024

Stable supply of fishery commodities was observed in the monitored markets.

##### R4A

###### WEEK 1- FEBRUARY 5-9, 2024

Despite the unfavorable weather condition, sufficient supply of fishery commodities was observed among the monitored markets.

However, there was an increase in the price of crab, which might be due to the high demand brought about by the celebration of Chinese New Year.

###### WEEK 2- FEBRUARY 12-16, 2024

Ample quantity of marine fishery commodities was reported this week.

However, prices may fluctuate due to the varying size, freshness, and source areas of the commodity.

###### WEEK 3- FEBRUARY 19-23, 2024

Minimal supplies of marine fishery commodities were observed this week. This might be affected by the occurrence of bright moon on 23 February wherein fishes tends to scatter making it hard for the fishermen to catch in one area.

Nonetheless, price of fishery commodities may vary depending on the commodity's quality (in terms of size and freshness).

###### WEEK 4- FEBRUARY 26- MARCH 1, 2024

Adequate supply of fishery commodities was observed in the monitored markets this week.

Prices may be affected by the quality (in terms of size and freshness) and source areas.

<b>R4B</b>																					
<b>WEEK 1- FEBRUARY 5-9, 2024</b>																					
Minimal availability of marine fishery commodities was observed in the monitored markets this week. This might be due to the bad weather condition. Meanwhile, prices may be affected by the transportation expenses.																					
<b>WEEK 2- FEBRUARY 12-16, 2024</b>																					
Sufficient supply of fishery commodities was observed this week. Prices may still be affected by the transportation expenses.																					
<b>WEEK 3- FEBRUARY 19-23, 2024</b>																					
Ample availability of marine fishery commodities was noted among the monitored markets this week. Even so, high prices of some fishes in the markets were observed which might be attributed to the transportation expenses.																					
<b>WEEK 4- FEBRUARY 26- MARCH 1, 2024</b>																					
Sufficient quantity of fishery commodities was observed in the monitored markets this week.																					
<b>R5</b>																					
<b>WEEK 1- FEBRUARY 5-9, 2024</b>																					
In general, sufficient supplies of marine fishery commodities supplies were observed. Commodities recorded were matambaka, hiwas, espada, dilis, and others. Even so, supply of imported-frozen galunggong was available in Camarines Norte. For aquaculture commodities (i.e., bangus, tilapia, and shrimp), steady availability was noted. Supplies were derived from chiefly from Calabanga and Pasacao.																					
<b>WEEK 2- FEBRUARY 12-16, 2024</b>																					
In general, sufficient availability of marine fishery commodities was observed. Commodities recorded were short fin scad, island mackerel, pichandle barracuda, common silver biddy, oxeye scad, tiger croaker, and others. Likewise, for aquaculture commodities (i.e., bangus, tilapia, and hipon), supplies remained available in the monitored markets for the consuming public.																					
<b>WEEK 3- FEBRUARY 19-23, 2024</b>																					
Adequate supply of marine fishery commodities was observed this week. Commodities recorded were anchovies, trevally, island mackerel, and others. Likewise, for aquaculture commodities such as bangus and tilapia, supplies were sufficient to cater to the demand of the buying public.																					
<b>WEEK 4- FEBRUARY 26- MARCH 1, 2024</b>																					
Sufficient availability of marine fishery commodities was observed in the monitored markets this week.																					
<b>R6</b>																					
<b>WEEK 1- FEBRUARY 5-9, 2024</b>																					
Overall, supplies of marine fishery commodities were ample this week. In fact, higher supply of sardines, round scad, fusilier, and bigeye scad was noted at the time of monitoring. Consequently, supplies of aquaculture commodities such as bangus and tilapia were sufficient to cater to the demand of the buying public.																					
<b>WEEK 2- FEBRUARY 12-16, 2024</b>																					
Sufficient supply of marine fishery commodities was observed among the monitored markets this week. Among the commodities recorded were shrimp, squid, grouper, yellowfin tuna, sardines, goatfish, and others. Consequently, adequate supplies of aquaculture commodities such as bangus and tilapia were noted.																					
<b>WEEK 3- FEBRUARY 19-23, 2024</b>																					
Minimal but sufficient availability of marine fishery commodities were observed this week. This might be due to presence of bright moon last 23 February. Among the commodities recorded were round scad, bullet tuna, Indian mackerel, scallops, ponyfish, and others. On the other hand, for aquaculture commodities (i.e., bangus and tilapia), supplies remained stable.																					
<b>WEEK 4- FEBRUARY 26- MARCH 1, 2024</b>																					
Minimal supply of marine fishery commodities was observed in the monitored markets this week. This might be due to the presence of full moon last 24 February 2024, wherein fishes tends to scatter making them hard to catch. Nonetheless, for aquaculture commodities like bangus and tilapia, steady supply was noted. No price monitoring activity in the province of Aklan due to equally important activity.																					
<b>R7</b>																					
<b>WEEK 1- FEBRUARY 5-9, 2024</b>																					
Due to inclement weather conditions, minimal availability of marine fishery commodities was observed. In fact, prices of some fishery commodities increased this week.																					
<b>WEEK 2- FEBRUARY 12-16, 2024 - WEEK 4- FEBRUARY 26- MARCH 1, 2024</b>																					
Sufficient supply of fishery commodities was reported among the monitored markets this week.																					
<b>R8</b>																					
<b>WEEK 1- FEBRUARY 5-9, 2024</b>																					
Minimal supply of marine fishery commodities was observed. Gale warning was still enforced locally in some provinces in the Region. No price monitoring was conducted in Tacloban Market due to the equally important tasks of the assigned price enumerator.																					
<b>WEEK 2- FEBRUARY 12-16, 2024</b>																					
Despite the inclement weather condition, sufficient supply of fishery commodities was observed in some of the monitored markets this week. Difference in the prices might be due to the varying size, freshness, and source areas of the commodity.																					
<b>WEEK 3- FEBRUARY 19-23, 2024 - WEEK 4- FEBRUARY 26- MARCH 1, 2024</b>																					
Adequate quantity of both marine and aquaculture commodities was observed this week. Prices may vary depending on the quality (in terms of size and freshness).																					
<b>R9</b>																					
<b>WEEK 1- FEBRUARY 5-9, 2024</b>																					
Minimal volume of fishery commodities was observed among the monitored markets this week.																					
<b>WEEK 2- FEBRUARY 12-16, 2024</b>																					
Overall, sufficient supply of marine fishery commodities was observed this week. In fact, there was an abundant quantity of <i>Sardinella lemuru</i> in the monitored markets.																					
<b>WEEK 3- FEBRUARY 19-23, 2024</b>																					
Minimal but sufficient availability of marine fishery commodities was observed this week. This could possibly be due to the occurrence of bright moon wherein fishes tends to scatter making it hard them hard to catch.																					
<b>WEEK 4- FEBRUARY 26- MARCH 1, 2024</b>																					
Minimal quantity of fishery commodities was observed among the monitored markets this week. This might be due to the unfavorable condition (presence of strong winds) hampering fishing operations. Nonetheless, difference in price could be attributed to the varying quality (in terms of size and freshness) of the commodity.

<b>R10</b>																					
<b>WEEK 1- FEBRUARY 5-9, 2024</b>																					
Sufficient volume of fishery commodities was observed during the conduct of price monitoring. However, prices of fishery commodities may still be affected by the logistic cost.																					
<b>WEEK 2- FEBRUARY 12-16, 2024</b>																					
Due to the bad weather condition, minimal but sufficient availability of marine fishery commodities was observed this week. For the top fishery commodities (i.e., bangus, tilapia, and galunggong), supplies remained available in the monitored markets. Prices may still be affected by the quality (in terms of size and freshness) and transportation expenses.																					
<b>WEEK 3- FEBRUARY 19-23, 2024</b>																					
Mini																					
<b>WEEK 4- FEBRUARY 26- MARCH 1, 2024</b>																					
Supply of top fishery commodities (i.e., bangus, tilapia, and galunggong) remained available in the monitored markets this week.																					
<b>R11</b>																					
<b>WEEK 1- FEBRUARY 5-9, 2024</b>																					
Adequate fish supply was noted in all monitored wet markets this week.																					
<b>WEEK 2- FEBRUARY 12-16, 2024</b>																					
Minimal availability of marine fishery commodities was observed this week. This might be due to the hampered fishing operations caused by the bad weather condition (frequent rain).																					
<b>WEEK 3- FEBRUARY 19-23, 2024</b>																					
Due to the fair-weather condition, ample quantity of marine fishery commodities was observed this week. In fact, some of the prices of commodities decreased.																					
<b>WEEK 4- FEBRUARY 26- MARCH 1, 2024</b>																					
Among the monitored retail markets, stable supply of fishery commodities was observed this week.																					
<b>R12</b>																					
<b>WEEK 1- FEBRUARY 5-9, 2024</b>																					
Generally, minimal but sufficient availability of marine fishery commodities was observed among the monitored markets this week. This might be due to the inclement weather condition hampering fishing operations. Few buyers were noted at the time of monitoring in General Santos Fish Port Complex.																					
<b>WEEK 2- FEBRUARY 12-16, 2024</b>																					
Generally, stable supply of fishery commodities was observed in all the monitored markets this week.																					
<b>WEEK 3- FEBRUARY 19-23, 2024</b>																					
Constant supply of fishery commodities were observed in most of the monitored markets this week.																					
<b>WEEK 4- FEBRUARY 26- MARCH 1, 2024</b>																					
In general, sufficient quantity of fishery commodities was observed this week.																					
<b>R13</b>																					
<b>WEEK 2- FEBRUARY 12-16, 2024</b>																					
Due to the unfavorable weather condition, limited supply of fishery commodities was noted at the time of monitoring this week.																					
<b>WEEK 3- FEBRUARY 19-23, 2024</b>																					
Minimal availability of fishery commodities were still observed this week.																					
<b>WEEK 4- FEBRUARY 26- MARCH 1, 2024</b>																					
Minimal supply of fishery commodities was still observed among the monitored markets this week.																					
<b>NCR</b>																					
<b>The following observations were gathered from market vendors and administrators for the month of February:</b>																					
1. Generally, sufficient supplies of fresh marine commodities were observed among the monitored retail markets throughout the whole month. This may be attributed to the lifted implementation of Closed Fishing Season in Northeastern Palawan (major fishing ground) for local galunggong on 1 February 2024, as well as the lifted Closed Fishing Season in Visayan Sea for sardines, herrings, and mackerels on 16 February 2024.																					
2. Consequently, supply of local-fresh galunggong lakaki ( <i>Decapterus macrosoma</i> ) were ample in the monitored retail markets this month. In fact, supply from Palawan, Romblon and nearby Provinces in Northeastern Palawan was observed available in the wholesale to the retail markets. The recorded prevailing retail price of medium-sized local-fresh galunggong lakaki was Php200/kg. Other local galunggong variants like "balsa" ( <i>Decapterus macarellus</i> ), "babae" ( <i>Decapterus russelli</i> ) and "burot" ( <i>Decapterus kurroides</i> ) were recorded in some of the monitored retail markets.																					
3. Even though supplies of local-fresh galunggong-lakaki ( <i>Decapterus macrosoma</i> ) were adequate, supply of imported-frozen galunggong lakaki were still recorded in the monitored retail markets this month. However, decreasing availability of frozen variants were observed due to the emerging supply of local-fresh variants. The prevailing retail price of medium-sized imported-frozen galunggong was Php200/kg this month. Other imported-frozen commodities like galunggong babae, pompano, salmon head, belly, meat and pusit kalawang were also noted in the monitored markets.																					
4. For tilapia ( <i>Oreochromis niloticus</i> ), stable and sufficient supply was still observed among the monitored retail markets. The recorded prevailing retail price of medium-sized tilapia remained at Php160/kg this month. There is still Php20-30/kg price difference between live and fresh-chilled tilapia.																					
5. For bangus ( <i>Chanos chanos</i> ), constant supplies from major source areas were still observed among the monitored retail markets this month. The recorded prevailing retail price of medium sized commodity was steady at Php180.00/kg. Nonetheless, some fish vendors in Muñoz, Trabajo, Galas, and Tandang Sora prefer selling larger size bangus due to higher demand from consumers.																					
6. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas:																					
a. Bangus - Bulacan, Pangasinan																					
b. Tilapia - Batangas, Pampanga																					
c. Local Galunggong - Navotas Fish Ports, Malabon Fish Port, Lucena Quezon																					
d. Imported Galunggong - Navotas Fish Port																					
e. Alumahan - Malabon Fish Port																					
<b>General Observation</b>																					
Fluctuation in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volumes of available supply, source area, as well as the weather condition and other natural phenomena.																					
1. <i>Rastrelliger kanagurta</i> or Alumahan (Mixed sizes) (Php 120.00-320.00 /kg) - supplies with the lowest prevailing price of Php 120.00 /kg were recorded in Region 9 wherein the said commodity was smaller in size, hence, price is lower. Meanwhile, supplies with the highest prevailing price of Php 320.00 /kg were recorded in Region 2 wherein the available supply were larger in size, hence, price was higher.																					
2. <i>Alepes djedaba</i> or Salay batang (Php 220.00-370.00 /kg) - both the lowest and highest prevailing prices of Php 230.00/kg and Php 360.00/kg, respectively, were recorded in NCR. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																					
3. <i>Carangoides malabaricus</i> or Talakitok (Php 250.00-450.00 /kg) - both the lowest and highest prevailing prices of Php 250.00/kg and Php 450.00/kg, respectively, were recorded in Region 6. Retail prices recorded were influenced by the varying sizes, quality (in terms of freshness), and volume of supplies available.																					
4. <i>Corbicula fluminea</i> or Burnay (Php 100.00 & 400.00 /kg) - supplies with the lowest prevailing price of Php 100.00/kg were recorded in Region 10 wherein the said commodity was smaller in size, hence, price is lower compared to Region 5.																					
5. <i>Gerres sp.</i> or Latab (Php 120.00-240.00 /kg) - supplies with the lowest prevailing price of Php 120.00/kg were recorded in Region 9 wherein the said commodity was smaller in size, hence, the price is lower compared to NCR.																					
6. <i>Glossogobius giuris</i> or Bias (Php 160.00-420.00 /kg) - supplies with the lowest prevailing price of Php 160.00/kg were recorded in CARAGA wherein the said commodity was smaller in size, hence, the price is lower compared to NCR.																					
7. <i>Gobiopterus lacustris</i> or Dulong (Php 200.00-320.00 /kg) - supplies with the lowest prevailing price of Php 200.00/kg were recorded in Region 4A wherein the said commodity was smaller in size, hence, price is lower compared to NCR.																					
8. <i>Leiognathus equulus</i> or Sapsap (Php 80.00-500.00 /kg) - supplies with the lowest prevailing price of Php 80.00/kg were recorded in Region 6 wherein the said commodity was smaller in size, hence, price is lower compared to Region 4A.																					
9. <i>Lethrinus nebulosus</i> or Katambak (Php 220.00 & 380.00 /kg) - supplies with the lowest prevailing price of Php 220.00/kg were recorded in Region 9 wherein the said commodity was smaller in size, hence, price is lower compared to Region 8.																					
10. <i>Nematalosa nasus</i> or Kabasi (Php 80.00 & 210.00 /kg) - supplies with the lowest prevailing price of Php 80.00/kg were recorded in Region 1 wherein the said commodity was smaller in size, hence, price is lower compared to NCR.
