The following observations were gathered from market personnel and vendors this week:

- Stable and sufficient volume of fresh marine commodities was observed among the monitored retail markets this week. Consequently, for local-fresh galunggong lakai (*Decapterus macrosoma*), supplies remained available for the consuming public. The recorded prevailing price of medium-sized commodity was maintained at Php200.00/kg. Other local galunggong variants like "babae" (*Decapterus russelli*), "burot" (*Decapterus karreri*), and "balas" (*Decapterus macarellus*) were noted in some of the monitored retail markets this week.
- On the other hand, for the imported-frozen galunggong, minimal supply of this variant were still observed at the monitored retail markets this week. This could be due to the adequate supply of local galunggong, which is more preferred by consumers. The prevailing retail price was Php140.00-200.00/kg this week. There were other imported-frozen commodities like pampano, salmon mackerel, salmon head & belly, pusit kalawang, and tulingan available at the monitored markets.
- Supplies of medium-sized alumahan (*Rastrelliger kanagurta*) remained sufficient at the monitored retail markets this week. The prevailing retail price remained at Php240.00/kg. Said supplies were mostly sourced from Lucena (Quezon), Malabon, and Navotas Fish Ports.
- Same prevailing retail price for medium-sized bangus (*Chanos chanos*) at Php180.00/kg was noted at the monitored retail markets this week. This may be due to the stable and sufficient supplies in the monitored markets. However, some vendors in Trabajo, Tandang Sora, Mega-Q, Galas and Muñoz markets prefer selling larger sized bangus due to higher demand from consumers. Most of the buyers prefer bangus sourced from Pangasinan than bangus sourced from Bulacan due to its premium quality.
- For tilapia (*Oreochromis niloticus*), supplies continued to be sufficient and stable at the monitored markets this week. As a result, the prevailing retail price was stable at Php120.00, 150.00, & 160.00/kg. Some buyers still prefer tilapia sourced from Batangas due to the commodity's quality (in terms of taste and appearance). Also, there is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia.
- According to vendors, there is still low demand for fishery commodities from consumers/buyers at the markets. Some vendors lowered their quantity of supply for selling to avoid loss.
- Top fishery commodities in the seventeen (17) monitored retail markets are sourced mainly from the following areas:
 - Bangus - Bulacan, Pangasinan
 - Tilapia - Batangas, Pampanga
 - Local Galunggong - Palawan, Lucena & Malabon Fish Ports
 - Alumahan - Lucena and Malabon & Navotas Fish Ports
