**The following observations were gathered from market personnel and vendors this week:**  
1. Generally, sufficient volumes of marine fishery commodities were observed among the monitored retail markets this week. For medium-sized alumahan (*Rastrelliger kanogurta*), supplies remained adequate and were mostly sourced from Lucena, Malabon, And Navotas Fish Ports priced at Php200, 240, & 280.00/kg at the monitored retail markets this week.  
2. Abundant supplies for local-fresh galunggong (*Decapterus macrosoma*) were observed at the monitored retail markets this week. As a result, the prevailing retail price decreased at Php200.00/kg this week. According to vendors, more unloadings were observed at the fish ports this week. Other local galunggong variants like "balsa" (*Decapterus macarellus*), "babae" (*Decapterus russelli*) and "burot" (*Decapterus kurroides*) were noted in some of the monitored retail markets this week.  
3. For imported-frozen galunggong, limited supplies were still reported due to the abundant supply of local galunggong at the retail markets. More specifically, only Guadalupe and Maypajo markets were observed with an available supply of imported-frozen galunggong priced at Php150 & 190/kg. There were other imported-frozen commodities like pampano, salmon mackerel, salmon head & belly, pusit kalawang, and tulingan were recorded at the monitored markets.  
4. No changes were noted in the prevailing retail price of bangus (*Chanos chanos*) at Php180.00/kg. This may be due to the stable and sufficient supplies at the monitored retail markets this week. Most of the buyers prefer bangus sourced from Pangasinan than bangus sourced from Bulacan due to its premium quality.  
5. The prevailing retail price of tilapia (*Oreochromis niloticus*) remained stable due to the continued sufficient supplies at the monitored markets this week. The prevailing retail price was steady at Php120 & 140 /kg. Some buyers still prefer tilapia sourced from Batangas than sourced from Pampanga due to the commodity's quality (in terms of taste and appearance). Also, there is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia.  
6. Top fishery commodities in the seventeen (17) monitored retail markets are sourced mainly from the following areas:  
a. Bangus - Bulacan, Pangasinan  
b. Tilapia - Batangas, Pampanga  
c. Local Galunggong - Palawan, Lucena, & Malabon Fish Ports  
d. Alumahan - Lucena and Malabon & Navotas Fish Ports

**Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.**  
1. *Uroteuthis bartschi* or Pusit - lapis - (Php200-440/kg) - lowest prevailing price of Php260.00/kg were recorded at Caloocan Market where supplies were mostly small in size and were not in good quality (supplies from previous days), hence, the lower price. Highest prevailing price of Php440.00/kg was noted at a secondary market (i.e., Guadalupe Market) where supplies are mainly sourced from primary market and were mostly large, hence, the higher price.

(- ) - Price and Volume not available during price monitoring  
(\*) - Actual Price - refers to the prices in the absence of the most frequently occurring value per fresh fishery commodity per sampling size at a given time.  
NA - Source Area not available during price monitoring
