Remarks/Market Observations:	<b>The following observations were gathered from market personnel and vendors this week:</b>																										
	1. Still, adequate availability of fresh marine commodities was reported this week. Despite this, fish vendors in the monitored retail markets reported a slight decrease in the availability of unloaded fishery commodities, possibly due to the occurrence of a bright moon on April 23, 2024, wherein fishes tends to scatter, making them hard to catch. Also, a low influx of buyers were observed and reported by the fish vendors during the conduct of price monitoring. In fact, markets like Tandang Sora, exhibited low quality of fish in terms of freshness as most of the supply were leftovers from previous market days due to low demand. Nevertheless, there was an adequate availability of local fresh galunggong lakaki ( <i>Decapterus macrosoma</i> ) noted, sourced from Palawan, Romblon, Lucena, Farmers Market (wholesale), Malabon, and Navotas Fish Port.																										
	2. Relatively, limited availability of imported-frozen galunggong lakaki was observed this week. As recorded, only Caloocan Public market was recorded with supply of medium-sized of the commodity while only large-size was noted in Polo Public market, sourced from Malabon and Navotas Fish Port, respectively.																										
3. Adequate availability of medium-sized alumahan ( <i>Rastrelliger kanagurta</i> ) was observed in the monitored markets this week. The presence of hasa-hasa ( <i>Rastrelliger brachysoma</i> ) was also recorded.																											
4. There was a sufficient supply of bangus ( <i>Chanos chanos</i> ) and tilapia ( <i>Oreochromis niloticus</i> ) was observed in the monitored retail markets this week. As reported, some fish vendors adjusted their prices slightly due to low demand for aquaculture commodities, resulting in a minimal decrease in price for both commodities in selected markets (i.e., Commonwealth, Balintawak, and Mega-Q).																											
5. Major source areas of the top fishery commodities in the monitored markets are as follows:																											
a. Retail																											
a.1. Bangus - Bulacan																											
a.2. Tilapia - Batangas																											
a.3. Local Galunggong - Malabon Fish Port																											
a.4. Imported Galunggong - Navotas Fish Port																											
a.5. Alumahan - Malabon Fish Port																											
<b>General Observations:</b>																											
<b>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</b>																											
1. <i>Decapterus macrosoma</i> or Galunggong lakaki (Large) - (Php140.00 - 260.00/kg)-the lowest prevailing price of Php140.00/kg is noted in Malabon Central Market, where supplies were reported to be remaining stocks from previous market days. Hence, they exhibit low quality in terms of freshness compared to the supplies in Marikina market, which are noted to have premium quality freshness sourced from Lucena. Consequently, they command a relatively higher price.																											
2. <i>Sillago sihama</i> or Asohos - (Php180.00-280.00/kg)- the lowest prevailing price of Php 180.00/kg was recorded in Guadalupe market, where the observed supplies were smaller in size compared to the supplies recorded in Polo Public Market, where larger-size of the commodity were observed.																											
(-) - Price Not Available During Price Monitoring																											
(*) - Actual Price - refers to the prices in the absence of the most frequently occurring value per fresh fishery commodity per sampling size at a given time.																											
NA - Source Area not available during price monitoring
