Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> In general, ample supplies of fresh marine commodities were noted at the monitored retail markets this week. According to fish vendors, abundant variety of supplies were unloaded in different fish ports this week. More specifically, for local-fresh galunggong, adequate supplies were still recorded and were mostly sourced from Palawan. This resulted to a stable prevailing retail price of Php240.00/kg this week. There were other local galunggong variants like "balsa" (<i>Decapterus macarellus</i>), "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) noted in some of the monitored retail markets this week. Due to the abundant supplies of local-fresh galunggong, low availability of imported-frozen galunggong were recorded this week. More specifically, only Maypajo market was observed with an available supply of imported-frozen galunggong priced at Php190/kg. According to vendors, most of the buyers prefer local than imported. Other imported-frozen commodities like pampano, salmon mackerel, salmon head & belly, pusit kalawang, and tulingan were still recorded at the monitored markets. The prevailing retail price of bangus (<i>Chanos chanos</i>) was at Php140 & 160.00/kg this week. According to fish vendors, some of them decreased their selling prices to compete with the low prices of fresh marine commodities. Stable and sufficient supplies were still noted at the monitored retail markets this week. Most of the buyers prefer bangus sourced from Pangasinan than bangus sourced from Bulacan due to its premium quality. For medium-sized tilapia (<i>Oreochromis niloticus</i>), supply remained sufficient and stable at the monitored markets this week. As a result steady prevailing retail price was observed at Php130 & 140 /kg. Most of the buyers still prefer tilapia sourced from Batangas than sourced from Pampanga due to the commodity's quality (in terms of taste and appearance). There is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia. According to vendors, low influx of buyers were continuously noted among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Also, some vendors were only opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people noted in the retail markets. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> Bangus - Bulacan, Pangasinan Tilapia - Batangas, Pampanga Local Galunggong - Palawan, Lucena, & Malabon Fish Ports Alumahan - Lucena and Malabon & Navotas Fish Ports
