Remarks/Market Observations: The following observations were gathered from market personnel and vendors this week: 1. Minimal but sufficient volume of supplies of marine fishery commodities were noted among the monitored retail markets this week due to the hampered fishing operations caused by rainy weather condition across the country. 2. For medium-sized local-fresh galunggong "lalaki" (<i>Decapterus macrosoma</i>), supplies remained adequate at the monitored retail markets this week and mostly sourced from Northern Palawan and Quezon. This resulted to a stable prevailing retail price at Php200.00/kg this week. Other local galunggong variants like "balsa" (<i>Decapterus macarellus</i>), "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) were noted in some of the monitored retail markets this week. 3. Despite the constant unloading of medium-sized local-fresh galunggong, there were still available supplies in two (2) retail markets (Balintawak & Caloocan) observed this week. The prevailing retail price of imported-frozen galunggong is recorded at Php190.00/kg. There were other imported-frozen commodities like pampano, salmon mackerel, salmon head & belly, pusit kalawang, and tulingan were still recorded at the monitored markets. 4. No changes were noted in the prevailing retail prices of bangus at Php150 & 160/kg recorded at the monitored markets this week. This may be due to the stable and sufficient supplies. Most of the buyers still prefer bangus sourced from Pangasinan than bangus sourced from Bulacan due to its premium quality. 5. For tilapia, prevailing retail price remained at Php130.00/kg due to the sufficient and stable supply this week. According to vendors, most of the buyers still prefer tilapia sourced from Batangas than sourced from Pampanga due to the commodity's quality (in terms of taste). There is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia. 6. According to vendors, low influx of buyers were continuously noted among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Also, some vendors were only opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people noted in the retail markets. 7. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: a. Bangus - Bulacan, Pangasinan b. Tilapia - Batangas, Pampanga c. Local Galunggong - Palawan, Quezon, Zambales, & Malabon Fish Ports d. Alumahan - Lucena and Malabon & Navotas Fish Ports																										
			Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena. 1. <i>Scylla serrata</i> or Alimango - female - (Php650-750/kg) - lowest prevailing price of Php650.00/kg were recorded at Farmers Market where supplies were smaller size, hence, the lower price. Highest prevailing price of Php750.00/kg was noted at Marikina Market where supplies recorded were in good quality, hence, the higher price. 2. <i>Oratosquilla oratoria</i> or Tatampal Puti - (Php190 & 400/kg) - lowest prevailing price of Php190.00/kg were recorded at Caloocan Market where supplies were sourced directly from Navotas Fish Port hence, the lower price. Highest prevailing price of Php400.00/kg was noted at Pasig Market where supplies recorded were in good quality, hence, the higher price. 3. <i>Siganus sp.</i> or Samaral - (Php300 & 400/kg) - lowest prevailing price of Php300.00/kg were recorded at Guadalupe Market where supplies were from previous market days, hence, the lower price. Highest prevailing price of Php400.00/kg was noted at Mandaluyong Market where supplies recorded were in good quality, hence, the higher price.
