Remarks/Market Observations:	<p><b>The following observations were gathered from market personnel and vendors this week:</b></p> <ol style="list-style-type: none"> <li>Ample supplies of fresh marine commodities were observed among the monitored retail markets this week despite the occurrence of full moon on May 23, 2024.</li> <li>More specifically, for local-fresh galunggong, adequate supplies were still noted at the monitored retail markets this week and were mostly sourced from Palawan &amp; Lucena. Other local galunggong variants like "balsa" (<i>Decapterus macarellus</i>), "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) were noted in some of the monitored retail markets this week.</li> <li>Only two (2) monitored retail markets (Quinta &amp; Caloocan) were observed to have available supplies of imported-frozen galunggong this week. This may be due to the adequate supply of local-fresh galunggong. The price of medium-sized imported-frozen galunggong was Php180.00/kg and Php190.00/kg. According to fish vendors, most of the buyers still prefer local than imported commodity. There were other imported-frozen commodities like pompano, salmon mackerel, salmon head &amp; belly, pusit kalawang, and tulingan were still recorded at the monitored markets.</li> <li>Some prevailing retail price were noted for bangus (<i>Chanos chanos</i>) at Php150 &amp; 180/kg due to the stable and sufficient supplies at the monitored retail markets. Most of the buyers prefer bangus sourced from Pangasinan than bangus sourced from Bulacan due to its premium quality.</li> <li>No changes were noted at the prevailing retail price of medium-sized tilapia (<i>Oreochromis niloticus</i>) at Php110, 130 and 150/kg this week. This may be attributed to the sufficient and stable supply. Most of the buyers still prefer tilapia sourced from Batangas than sourced from Pampanga due to the commodity's quality (in terms of taste and appearance). There is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia.</li> <li>According to fish vendors, low influx of buyers were continuously noted among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold out by the end of the day. Also, some vendors were only opening on an alternate day schedule or during market days (Friday-Sunday) where there are more people noted in the retail markets.</li> <li>Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> <li>Bangus - Bulacan, Pangasinan</li> <li>Tilapia - Batangas, Pampanga</li> <li>Local Galunggong - Palawan, Lucena, &amp; Malabon Fish Ports</li> <li>Alumahan - Lucena and Malabon &amp; Navotas Fish Ports</li> </ol> </li> </ol>																							
	<p><b>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</b></p> <ol style="list-style-type: none"> <li><i>Penaeus monodon</i> or Sugpo - (Php450 &amp; 550/kg) - lowest prevailing price of Php450.00/kg were recorded at Guadalupe Market where supplies were not in good quality (supplies from previous days), hence, the lower price.
