<b>Remarks/Market Observations</b>			7. Fluctuations in the prices of the top fifteen (15) and other commodities are influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena. *Uroteuthis bartschi or Pusit -lapis - (Php180.00 & 440.00/kg) - lowest prevailing price of Php180.00/kg were recorded in the 3rd and 4th week at Balintawak Market where supplies were sourced directly from Navotas Fish Port, hence, the lower price. Highest prevailing price of Php440.00/kg was also noted in the 2nd and 3rd week at Mandaluyong Market where supplies recorded were in good quality and sourced from a primary market, hence, the higher price. *Pseudorhombus spp. or Dapa - (Php350.00 & 480.00/kg) - both of the lowest and highest prices were recorded at Farmers Market. The difference in the is due to the size of the commodity (small and large size).
