Remarks/Market Observations:			<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> 1. An ample supply of fresh marine commodities were observed among the monitored retail markets this week. This may be attributed to the good weather condition compared from previous days. 2. For medium-sized local-fresh galunggong "lalaki" (<i>Decapterus macrosoma</i>), sufficient supplies were noted with a prevailing retail price of Php280.00/kg. Other local galunggong variants like "balsa" (<i>Decapterus macarellus</i>), "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) were also observed but in limited volume at the monitored retail markets. 3. Due to the sufficient supply of local galunggong, only Maypajo, Polo and Quinta Markets have available supply of imported-frozen galunggong this week. Most of the vendors still prefer selling local than imported galunggong. The prevailing retail price of imported-frozen galunggong is recorded at Php190/kg. There were other imported-frozen commodities like pampano, salmon mackerel, salmon head & belly, pusit kalawang, and tulingan available and recorded at the monitored markets. 4. No changes in the prevailing retail prices of medium-sized bangus (<i>Chanos chanos</i>) and tilapia (<i>Oreochromis niloticus</i>) at Php180.00/kg and Php120.00/kg, respectively. This may be due sufficient and stable supplies at the monitored markets. Most of the buyers still prefer bangus sourced from Pangasinan than supplies sourced from Bulacan due to its premium quality. On the other hand, most of the buyers still prefer tilapia sourced from Batangas than those from Pampanga due to the commodity's quality (in terms of taste). There is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia. 5. According to the vendors, low influx of buyers were continuously noted among the monitored retail markets this week. As a result, vendors preferred to sell lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold by the end of the day. Also, some vendors were only open for selling on an alternate day schedule or during market days (Friday-Sunday) where there are more people in the retail markets. 6. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> a. Bangus - Bulacan, Pangasinan b. Tilapia - Batangas, Pampanga c. Local Galunggong - Palawan, Quezon, Romblon, & Malabon Fish Ports d. Alumahan - Lucena and Malabon & Navotas Fish Ports
