<p>Remarks/Market Observations:</p> <p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> 1. Minimal but sufficient supplies of fresh marine commodities were observed in the monitored retail markets this week. According to vendors, low volume of supplies were still noted from different fish ports due to the effects of Super Typhoon "Carina" last July 19-25. 2. Lesser volume of medium-sized local-fresh galunggong "lalaki" (<i>Decapterus macrosoma</i>) were recorded at the monitored retail markets this week. This resulted to an increase in retail price at Php200.00 & 280.00/kg this week. Other local galunggong variants like "balsa" (<i>Decapterus macarellus</i>), "babae" (<i>Decapterus russelli</i>) and "burot" (<i>Decapterus kurroides</i>) were also noted in limited quantities at the monitored retail markets this week. 3. For imported-frozen galunggong, more supplies were noted at Balintawak, Munoz, Kamuning and Caloocan markets this week. Vendors sell imported galunggong as a substitute commodity for local galunggong. The prevailing retail price of imported-frozen galunggong is recorded at Php180 & 190/kg. There were other imported-frozen commodities like pampano, salmon mackerel, salmon head & belly, pusit kalawang, and tulingan available and recorded at the monitored markets. 4. The prevailing retail price of medium-sized bangus (<i>Chanos chanos</i>) remained at a relatively high price of Php180.00/kg. Supplies remained sufficient and stable to cater the public demand at the monitored markets. Most of the buyers still prefer bangus sourced from Pangasinan than bangus sourced from Bulacan due to its premium quality. 5. For tilapia, the prevailing retail price of medium-sized tilapia remained at Php130.00/kg due to the sufficient and stable supply this week. Most of the buyers still prefer tilapia sourced from Batangas than sourced from Pampanga due to the commodity's quality (in terms of taste). There is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia. 6. According to the vendors, low influx of buyers were continuously noted among the monitored retail markets this week. As a result, vendors are coping by selling lower volumes and limited varieties of fishery commodities to ensure that all supplies are sold by the end of the day. Also, some vendors were only open for selling on an alternate day schedule or during market days (Friday-Sunday) where there are more people noted in the retail markets. 7. Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> a. Bangus - Bulacan, Pangasinan b. Tilapia - Batangas, Pampanga c. Local Galunggong - Palawan, Quezon, Zambales, & Malabon Fish Ports d. Alumahan - Lucena and Malabon & Navotas Fish Ports 																										

(-) - Price and Volume not available during price monitoring

(*) - Actual Price - refers to the prices in the absence of the most frequently occurring value per fresh fishery commodity per sampling size at a given time.

NA - Source Area not available during price monitoring
