| <p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> A lesser display of fresh marine commodities was observed this week among the monitored retail markets. Additionally, some fish vendors reported higher wholesale prices for these commodities. This is likely due to hampered fishing operations caused by the Severe Tropical Storm "Enteng" affecting most part of the country from September 1-4, 2024. As a result, some fish stalls were observed closed. This may be because vendors opted not to sell due to the increased capital required by the higher wholesale prices. Limited unloading of local fresh galunggong lalaki (<i>Decapterus macrosoma</i>) was also reported this week. However, medium-sized galunggong remains available in all monitored markets, sourced from various areas including Lucena, Farmers Market (wholesale), Malabon, and Navotas Fish Port. Minimal display of medium-sized imported galunggong lalaki was also observed this week. In fact, only in Balintawak and Caloocan markets have recorded supply sourced from Navotas Fish Port. Despite, the supply of large-sized commodity was recorded in selected markets (e.g., Commonwealth, Mega-Q, Muñoz, Kamuning, Caloocan, and Polo). Vendors preferred these due to their affordable price, which made them easier to sell. Limited availability of medium-sized alumahan (<i>Rastrelliger kanagurta</i>) was evident at the monitored markets this week. Despite, adequate display of large size of the commodity was recorded. Sufficient supplies of bangus and tilapia were recorded at the monitored markets this week. Prices for these commodities remained stable. Major source areas of the top fishery commodities in the monitored markets are as follows: <ol style="list-style-type: none"> Bangus - Bulacan Tilapia - Batangas Local Galunggong - Malabon Fish Port Imported Galunggong - Navotas Fish Port Alumahan - Malabon Fish Port <p>General Observations:</p> <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Scarus</i> spp. or Momol(Php100.00/kg & Php240.00/kg) - The lowest prevailing price of Php 100.00/kg was noted in Malabon Central Market, where supplies were sourced directly from Malabon Fish Port (wholesale). In contrast, supplies observed in Mandaluyong Market, a secondary market typically sourcing from primary markets (i.e., farmers' market wholesale), were offered at a significantly higher price of Php 240.00/kg. <i>Selar crumenophthalmus</i> or Matambaka (Php240.00, 260.00, 360.00/kg) - the lowest prevailing price of Php 240.00/kg was recorded in Commonwealth and Mega-Q markets (both primary markets). This is in comparison to the highest recorded price of Php 360.00/kg in secondary markets (i.e., Tandang Sora and Kamuning), which were also sourced from farmers' markets. <i>Sphyraena</i> spp. or Torsilyo (Php250.00/kg - Php360.00/kg) - The lowest prevailing price of Php 250.00/kg was noted in Malabon Central Market, where the supplies were smaller in size compared to the highest recorded price of Php 360.00/kg in Mandaluyong Market, resulting in the higher price. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p><i>Note: No price monitoring activity was conducted on September 3, 2024, due to work suspension caused by the effects of Tropical Storm 'Enteng'.</i></p> <p>(-) - Price Not Available During Price Monitoring (*) - Actual Price - refers to the prices in the absence of the most frequently occurring value per fresh fishery commodity per sampling size at a given time.
