Remarks/Market Observations:	<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> An adequate supply of fresh marine commodities was observed among the monitored retail markets. For medium-sized local fresh galunggong lalaki (<i>Decapterus macrostoma</i>), ample availability and supply was still observed. However, market vendors reported that there is low demand for fresh marine commodities this week. Limited display of imported-frozen galunggong lalaki (<i>D. macrostoma</i>) was recorded this week. Only Polo Public Market was recorded to have a display of this commodity sourced from Navotas Fish Port. Meanwhile, large-sized were also observed in Quinta and Mega-Q market with actual retail price recorded (not more than three stalls offered this commodity) while prevailing retail price for this commodity was recorded at Polo Public Market and Maypajo Caloocan Market. Still, minimal availability of medium-sized alumahan (<i>Rastrelliger kanagurta</i>) was recorded among the monitored retail markets this week. Unpredictable availability of this commodity was still observed among all the monitored retail markets. For aquaculture commodities such as bangus (<i>Chanos chanos</i>) and tilapia (<i>Oreochromis niloticus</i>), adequate supply was still recorded this week in all of the monitored retail markets. Major source areas of the top fishery commodities in the monitored markets are as follows: <ul style="list-style-type: none"> a. Retail <ul style="list-style-type: none"> a.1. Bangus - Bulacan a.2. Tilapia - Batangas a.3. Local Galunggong - Malabon Fish Port a.4. Imported Galunggong - Navotas Fish Port a.5. Alumahan - Malabon Fish Port 																																	
	<p>General Observations:</p> <p>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</p> <ol style="list-style-type: none"> <i>Scylla serrata</i> or Alimango (Female) (Php700.00-Php1100.00) - The lowest prevailing price of Php700.00/kg is noted in Marikina Market, where supplies were reported to be remaining stocks from previous market days and noted to have smaller sizes. Hence, they exhibit low quality in terms of freshness compared to the supplies in Farmers Market, which are noted to have premium quality freshness and larger sizes. Consequently, they command a relatively higher price. Marikina and Balintawak <i>Dendrophysa russelii</i> or Akaak (Php100.00-Php200.00) - Both lowest and highest prevailing retail price were noted at Pasig market were some stalls sell their products at Php100.00/kg only due to its low quality (supplies from previous market days). While supplies with Php200.00/kg were noted to be fresh and in good quality. <i>Parupeneus</i> spp. or Saramulyete (Php180.00-Php300.00) - Lowest prevailing retail price were recorded at Pasig Market at Php180.00/kg where supplies was directly sourced from wholesale market with less added transportation cost and middlemen. While the highest prevailing retail price at Php300.00/kg was recorded at Maypajo Caloocan a Secondary type of market, supplies could have added amount of cost for transportion and middlemen. 																																	
<p>(-) - Price Not Available During Price Monitoring (*) - Actual Price - refers to the prices in the absence of the most frequently occurring value per fresh fishery commodity per sampling size at a given time. NA - Source Area not available during price monitoring</p> <p>Markets 1-10 (Trabajo to Galas) - Monitored by BFAR-FIDSSD (CO) Enumerators Markets 11-16 (Malabon Central to Ugong Valenzuela) - Monitored by BFAR-NCR Enumerators</p>
