<p>The following observations were gathered from market personnel and vendors this week:</p> <ol style="list-style-type: none"> Overall, sufficient supply of fresh-marine commodities was observed in the seven monitored retail markets this week. In fact, ample availability of local-fresh galunggong-lalaki (<i>Decapterus macrosoma</i>) was observed resulting in decrease of price in the monitored retail markets. Sufficient availability of medium-sized alumahan (<i>Rastrelliger kanugarta</i>) was also observed this week. Among monitored retail markets only Maypajo and Polo public market have unrecorded supply of this commodity. For aquaculture commodities such as bangus (<i>Chanos chanos</i>) and tilapia (<i>Oreochromis niloticus</i>), ample availability was still observed today. For bangus, the difference in price was caused primarily due to the differences in the source areas, where supply from Dagupan was much expensive compared to bangus from Bulacan, due to its premium quality (in terms of taste and size). Top Fishery Commodities in the 7 monitored retail markets in the NCR were sourced mainly from the following areas: <ol style="list-style-type: none"> Bangus – Dagupan Tilapia – Batangas Local Galunggong - Navotas Fish Port and Malabon Fish Port Alumahan – Navotas and Malabon Fish Port
