Remarks/Market Observations:	<p><b>The following observations were gathered from market personnel and vendors this week:</b></p> <ol style="list-style-type: none"> <li>Low volume of fresh marine commodities was observed in all monitored retail markets this week. This may be attributed to the inclement weather condition brought by Severe Tropical Storm "Kristine" (Trami) , which hinders fishing activity in the northern part of the country.</li> <li>More specifically, minimal volume of supplies were recorded for medium-sized local-fresh galunggong "lalaki" (<i>Decapterus macrosoma</i> ). This resulted to high prevailing retail price noted at Php320.00/kg this week. There were other local galunggong variants like "balsa" (<i>Decapterus macarellus</i> ), "babae" (<i>Decapterus russelli</i> ) and "burot" (<i>Decapterus kurroides</i> ) still noted but in limited quantities at the monitored retail markets this week.</li> <li>Due to the low volume of local-fresh galunggong, more supplies were noted for imported-frozen galunggong especially at Commonwealth, Balintawak, Munoz and Caloocan Markets this week. Most of the vendors started selling imported due to the higher price of local at different fish ports. The prevailing retail price of imported-frozen galunggong was recorded at Php240/kg. There were other imported-frozen commodities like pampano, salmon mackerel, salmon head &amp; belly, pusit kalawang, and tulingan were recorded at the monitored markets.</li> <li>Same prevailing retail prices were noted for bangus (<i>Chanos chanos</i> ) and tilapia (<i>Oreochromis niloticus</i> ) this week. According to vendors, supplies remained sufficient and stable at the monitored retail markets this week. The prevailing retail prices remained the same at Php180.00/kg and Php130.00/kg, respectively. There were still some buyers who still prefer tilapia sourced from Batangas than sourced from Pampanga due to the commodity's quality (in terms of taste). There is still a Php20-30.00/kg price difference between live and fresh-chilled tilapia.</li> <li>Top fishery commodities in the eighteen (18) monitored retail markets are sourced mainly from the following areas: <ol style="list-style-type: none"> <li>Bangus - Bulacan, Pangasinan</li> <li>Tilapia - Batangas, Pampanga</li> <li>Local Galunggong - Palawan, Quezon, Romblon, &amp; Malabon Fish Port</li> <li>Alumahan - Lucena and Malabon &amp; Navotas Fish Ports</li> </ol> </li> </ol>																									
	<p><b>Fluctuation in the prices of the top fifteen (15) and other commodities is influenced by a number of factors such as the commodity's size, quality, volume of supply, source area, as well as the weather condition and other natural phenomena.</b></p> <ol style="list-style-type: none"> <li><i>Thunnus albacares</i> or Tambakol-Sliced - (Php260-500/kg) - lowest prevailing price of Php260.00/kg were recorded at Malabon Market where supplies were sourced directly from Malabon Fish Port hence, the lower price. Highest prevailing price of Php500.00/kg was noted at a secondary market (i.e., Guadalupe Market) where supplies are mainly sourced from primary market, hence, the higher price.</li> <li><i>Cypselurus sp.</i> or Iliw - (Php160-300/kg) - both lowest and highest prevailing price were recorded at Mega-Q Market. The difference in the price is due to the size of the commodity wherein the recorded lowest price at Php160.00/kg were mostly small-sized and the highest price at Php300.00/kg were mostly large sized.</li> <li><i>Mugil cephalus</i> or Banak - (Php180-280/kg) - lowest prevailing price of Php180.00/kg were recorded at Malabon Market where supplies were sourced directly from Malabon Fish Port hence, the lower price. Highest prevailing price of Php280.00/kg was noted at a secondary market (i.e., Guadalupe Market) where supplies are mainly sourced from primary market, hence, the higher price.</li> <li><i>Pterocaesio tile</i> or Dalagang Bukid- Bilog - (Php200-300/kg) - both lowest and highest prevailing price were recorded at Commonwealth Market. The difference in the price is due to the size of the commodity wherein the recorded lowest price at Php200.00/kg were mostly small-sized and the highest price at Php300.00/kg were mostly large sized.</li> </ol>																									

(- ) - Price and Volume not available during price monitoring

(\*) - Actual Price - refers to the prices in the absence of the most frequently occurring value per fresh fishery commodity per sampling size at a given time.

NA - Source Area not available during price monitoring

Markets 1-10 (Trabajo to Galas) - Monitored by BFAR-FIDSSD (CO) Enumerators

Markets 11-16 (Malabon Central to Ugong Valenzuela) - Monitored by BFAR-NCR Enumerators
