**Remarks/Market Observations**

**The following observations were gathered during the actual price monitoring activities:**

- Generally, minimal availability and increased prices of fresh marine commodities were observed in the monitored retail markets this week, following the celebration of Christmas Day. In addition, the limited supplies of these commodities may be attributed due to disrupted fishing activities caused by Tropical Depression Romina, which affects the province of Palawan and nearby areas, as well as the shearline impacting the Visayas, Bicol Region, CALABARZON, and the rest of MIMAROPA. Consequently, medium-sized galunggong lalaki (*Decapтерus macrossoma*) still remained limited in the monitored retail markets today, with its prevailing retail price maintained at Php340.00/kg, sourced primarily from Malabon Fish Port.
- Due to high retail price of local-fresh galunggong-lalaki, market fish vendors in Balintawak, Muñoz, Commonwealth, and Maypajo Calococan opted to sell imported frozen galunggong-lalaki (*D. macrossoma*) at prevailing retail price of Php240.00/kg, sourced primarily from Navotas Fish Port.
- For the medium-sized alumahan, inadequate supplies of the commodity were observed among the monitored retail markets this week. In fact, only markets of Tandang Sora, Muñoz, Galas, Malabon, Mandaluyong, Marikina, Guadalupe, and Pasig, have recorded to have display of this commodity at prevailing retail price of Php160.00/kg to Php360.00/kg, with supplies sourced primarily from Farmers wholesale market.
